**Meanings of Abstract Art** Isabel Wnsche, Paul Crowther, 2016-09-15 Traditional art is based on conventions of resemblance between the work and that which it is a representation of Abstract art in contrast either adopts alternative modes of visual representation or reconfigures mimetic convention This book explores the relation of abstract art to nature taking nature in the broadest sense the world of recognisable objects creatures organisms processes and states of affairs Abstract art takes many different forms but there are shared key structural features centered on two basic relations to nature The first abstracts from nature to give selected aspects of it a new and extremely unfamiliar appearance The second affirms a natural creativity that issues in new autonomous forms that are not constrained by mimetic conventions Such creativity is often attributed to the power of the unconscious The book covers three categories classical modernism Mondrian Malevich Kandinsky Arp early American abstraction post war abstraction Pollock Still Newman Smithson Noguchi Arte Povera Michaux postmodern developments and the broader historical and philosophical scope  
**Abstract Art** Mel Gooding, 2001 This series introduces the major movements in late nineteenth and twentieth century art Each book is illustrated with works from Tate and other major collections around the world In a new approach to the subject the author rejects the view that the story of abstraction can be traced as a succession of stylistic trends each set within its particular art historical context He offers instead readings of specific paintings and sculptures by artists such as Kasimir Malevich Naum Gabo Piet Mondrian and Jackson Pollock treating them as exemplary of particular tendencies within the overlapping histories

of abstraction      *Information Brokers and Reference Services* Robin Kinder,Bill Katz,2019-12-06 The contradictory yet complementary relationship between libraries and information brokers is examined in this volume first published in 1988 Since its escalation in the 1960s information brokering has challenged the role of the library in society Librarians discuss their concerns about information brokers the impact of brokers on reference services the competence of brokers abuse of library services by brokers and whether libraries should provide competing fee based services Brokers share their own view as entrepreneurs providing background offering advice and explaining the risks involved in their business This lively often controversial discussion offers suggestions for improving relations between libraries and information brokers while continuing to serve the public well      *Abstraction in Science and Art* Chiara Ambrosio,Julia Sánchez-Dorado,2024-09-30 This volume explores the roles and uses of abstraction in scientific and artistic practice Conceived as an interdisciplinary dialogue between experts across histories and philosophies of art and science this collection of essays draws on the shared premise that abstraction is a rich and generative process not reducible to the mere omission of details in a representation When scientists attempt to make sense of complex natural phenomena they often produce highly abstract models of them In the history and philosophy of art there is a long tradition of debate on the function of abstraction and more recently its relation with theories of depiction Adopting a process oriented perspective the chapters in this volume explore the epistemic potential of a diversity of practices of abstracting The systematic analysis of a wide range of historical cases from early twentieth century abstractionist painting to contemporary abstract photography and from nineteenth century physics to recent research in biology and neurosciences invites the reader to reflect on the material lives of abstraction through concrete artefacts experimental practices and theoretical and aesthetic achievements *Abstraction in Science and Art Philosophical Perspectives* will be of interest to scholars and advanced students working in aesthetics philosophy of science and epistemology as well as to historians of science and art and to practicing artists and scientists interested in exploring foundational questions at the heart of the creative practice of abstracting The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Open access for this book was funded by University College London      **Abstraction in Modernism and Modernity** Jeff Wallace,2023-04-30 Explores abstraction as a keyword in aesthetic modernism and in critical thinking since Marx      *Abstraction in Medieval Art* Elina Gertsman,2025-10-01 Abstraction haunts medieval art both withdrawing figuration and suggesting elusive presence How does it make or destroy meaning in the process Does it suggest the failure of figuration the faltering of iconography Does medieval abstraction function because it is imperfect incomplete and uncorrected and therefore cognitively visually demanding Is it conversely precisely about perfection To what extent is the abstract predicated on theorization of the unrepresentable and imperceptible Does medieval abstraction pit aesthetics against metaphysics or does it enrich it or frame it or both Essays in this collection explore these and other questions that

coalesce around three broad themes medieval abstraction as the untethering of the image from what it purports to represent abstraction as a vehicle for signification and abstraction as a form of figuration Contributors approach the concept of medieval abstraction from a multitude of perspectives formal semiotic iconographic material phenomenological epistemological *Elements of Abstraction* Alan Fowler, Brandon Taylor, 2005 The artists featured include Gillian Ayres Ian Davenport Terry Frost Patrick Heron Roger Hilton Howard Hodgkin Callum Innes Peter Lanyon Ben Nicholson Victor Passmore and others Abstract art has puzzled and stimulated viewers since the origins of modern art Today it continues to offer sensations of unparalleled pleasure and complexity both seeming to simplify nature's appearances while at the same time revealing structures arising from the artists own analysis of visual phenomena Many of the forms of abstract art are based on geometrical musical biological or cosmic rhythms Such values are rarely examined in books and exhibitions today though public curiosity about abstract art has seldom been higher This publication aims to re open the debate on how abstract art exists and why *Abstraction and the Classical Ideal, 1760-1920* Charles A. Cramer, 2006 This study traces an important but largely overlooked conception of abstraction in art from its roots in eighteenth century empirical epistemology to its application in the pursuit of ideal form from Joshua Reynolds to Piet Mondrian Theorized by Enlightenment philosophy as a means of discovering ideal essence by purging natural form of its accidental and contingent qualities abstraction was a major focus of philosophical scientific and aesthetic discourse for more than one hundred fifty years serving as the nucleus of fundamental debates about the philosophy of mind the relationship between the Ancients and the Moderns the nature of human racial and functional variety the nature of God's creative ideas the use of brushwork in painting the validity of abstraction in art and the visual appearance of ideal truth and beauty *Abstract Painting and Abstraction* Emyr Williams, 2017-11-20 Abstract painting and abstraction can be a daunting and frustrating genre of art How should you approach a surface How can you use color effectively How can you make better more expressive paintings This inspiring book answers these questions and many more By looking at his own work Emyr Williams covers the practical issues of abstract art before explaining techniques to develop your own personal style and approach He emphasizes the relationship of color to surface and the importance of seeking a profound connection with your art **Philosophy and the Visual Arts** Andrew Harrison, 2012-12-06 This volume consists of papers given to the Royal Institute of Philosophy Conference on Philosophy and the Visual Arts Seeing and Abstracting given at the University of Bristol in September 1985 The contributors here come about equally from the disciplines of Philosophy and Art History and for that reason the Conference was hosted jointly by the Bristol University Departments of Philosophy and History of Art Other conferences sponsored by the Royal Institute of Philosophy have been concerned with links between Philosophy and related disciplines but here with the generous support of South West Arts and with the enthusiastic co operation of the staff of the Arnolfini Gallery in Bristol we were able to attempt even more in the way of bridge building not only were we able to hold some of our meetings in as

possible to the general the Gallery thus making them as accessible public but we were also privileged in having our discussions supported by two exhibitions of contemporary painting that together presented contrasting aspects of the abstracting enterprise One featuring works by Ian McKeever and drawings and painting by Frank Auerbach some of which are discussed and illustrated in the present volume was about the painterly exploration of abstracting from images in nature and in painting itself The other curated by Waldemar Januszczak while showing some figurative works was concerned with the pure power of colour perceived abstractly in its own right *Journal of the American Society for Information Science* American Society for Information Science,1997
