Herrstrom,2022-11-21 In *Light as Experience and Imagination from Medieval to Modern Times* David S Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making

sense of the individual's relationship with light rather than the investigation of light's essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times. Consequently, it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light, optical science, but rather with subjective reactions as reflected in art, architecture, and literature. Instead of its evolution, this book celebrates the complexity of our relation to light's character. No individual experience of light being truer than any other. **Art and Artists on Screen** John Albert

Making Images Move reveals a new history of cinema by uncovering its connections to other media and art forms. In this richly illustrated volume, Gregory Zinman explores how moving image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices, including painting and scratching directly on the film strip, deteriorating film with water, dirt, and bleach, and applying materials such as paper and glue. This book provides a comprehensive history of this tradition of handmade cinema from the early twentieth century to the present, opening up new conversations about the production, meaning, and significance of the moving image. From painted film to kinetic art and from psychedelic light shows to video synthesis, Gregory Zinman recovers the range of forms, tools, and intentions that make up cinema's shadow history, deepening awareness of the intersection of art and media in the twentieth century and anticipating what is to come. *Traces of Light* Ann Cooper Albright, 2007-09-04
