Art Of Navigation In England In Elizabeth:

The Sea Fathers: a Series of Lives of Great Navigators of Former Times Sir Clements Robert Markham, 1884 **The Long Process of Development** Jerry F. Hough, Robin Grier, 2015-04-30 This groundbreaking book examines the history of Spain England the United States and Mexico to explain why development takes centuries **The Voyages and Works of John Davis, the Navigator** John Davis, 1880 **Elizabeth's Admiral** Robert W. Kenny, 1970 England's Sea Empire, 1550-1642 David B. Quinn, A N Ryan, 2023-08-11 First published in 1983 England's Sea Empire was originally part of the Early Modern Europe Today book series It explores the relationships between the increase of English merchant shipping the growth of naval power and the early experiments in overseas trade and colonisation No other book combines these topics for the period from the middle of the 16th to the middle of the 17th century In dealing with economic strategic and technical problems the authors write in language which is intelligible to non specialist readers They illustrate the arguments with generous quotations from contemporary sources and with maps of the regions under discussion This book will be of value on undergraduate courses in early British or colonial or maritime history **John Dee's Natural Philosophy** Nicholas Clulee, 2013-02-15 This is the definitive study of John Dee and his intellectual career Originally published in 1988 this interpretation is far more detailed than any that came before and is an authoritative account for anyone interested in the history literature and scientific developments of the Renaissance or the occult John Dee has fascinated successive generations Mathematician scientist astrologer and magus at the court of Elizabeth I he still provokes controversy To some he is the genius whose contributions to navigation made possible the feats of Elizabethan explorers and colonists to others an alchemist and charlatan Thoroughly examining Dee's natural philosophy this book provides a balanced evaluation of his place and the role of the occult in sixteenth century intellectual history It brings together insights from a study of Dee's writings the available biographical material and his sources as reflected in his extensive library and more importantly numerous surviving annotated volumes from it **The Broadview Anthology of Sixteenth-Century Poetry and Prose** Marie Loughlin, Sandra Bell, Patricia Brace, 2011-10-24 The Broadview Anthology of Sixteenth Century Poetry and Prose makes available not only extensive selections from the works of canonical writers but also substantial extracts from writers who have either been neglected in earlier anthologies or only relatively recently come to the attention of twentieth and twenty first century scholars and teachers Popular fiction and prose nonfiction are especially well represented including selections from popular romances merchant fiction sensation pamphlets sermons and ballads The texts are extensively annotated with notes both explaining unfamiliar words and providing cultural and historical contexts Monarchs, Ministers, and Maps David Buisseret, 1992-12-15 These diverse essays investigate political factors behind the rapid development of cartography in Renaissance Europe and its impact on emerging European nations By 1500 a few rulers had already discovered that better knowledge of their lands would strengthen their control over them by 1550 the cartographer's art had become an important

instrument for bringing territories under the control of centralized government Throughout the following century increasing governmental reliance on maps demanded greater accuracy and more sophisticated techniques This volume a detailed survey of the political uses of cartography between 1400 and 1700 in Europe answers these questions When did monarchs and ministers begin to perceive that maps could be useful in government For what purposes were maps commissioned How accurate and useful were they How did cartographic knowledge strengthen the hand of government By focusing on particular places and periods in early modern Europe the chapters offer new insights into the growth of cartography as a science the impetus behind these developments often rulers attempting to expand their power and the role of mapmaking in European history The essay on Poland reveals that cartographic progress came only under the impetus of powerful rulers another explores the French monarchy's role in the burst of scientific cartography that marked the opening of the splendid century Additional chapters discuss the profound influence of cartographic ideas on the English aristocracy during the sixteenth century the relation of progress in mapmaking to imperialistic goals of the Spanish and Austrian Habsburgs and the supposed primacy of Italian mapmaking following the Renaissance Contributors to this volume are Peter Barber David Buisseret John Marino Michael J Mikos Geoffrey Parker and James Vann These essays were originally presented as the Kenneth Nebenzahl Jr Lectures in the History of Cartography at the Newberry Library Works Issued by the Hakluyt Society, 1880
