even living masters At the same time it was no longer controversial in academic and intellectual circles to maintain that art works are the products of what Howard Becker has termed collective activity carried out within loosely defined art worlds Works of art from this point of view are not the products of individual makers artists who possess a rare and special gift They are rather joint products of all the people who cooperate via an art world s characteristic conventions to bring works like that into existence Artists are some sub group of the world s participants who by common agreement possess a specialgift therefore make a unique and indispensable contribution to the work and thereby make it art 1982 35 The concept of the art world with its central focus on the collective social and conventional nature of artistic production distribution and appreciation confronts and potentially undermines the romantic ideology of art and artists still dominant in Western societies
