*and Distribution Contracts* Martijn W. Hesselink, Jacobien W. Rutgers, Odavia Bueno Diaz, Manolo Scotton, Muriel Veldman, 2009-04-27 The rules presented in this volume of Principles of European Law deal with commercial agency franchise and distribution contracts and with other contracts where one party uses the other party's skill and efforts to bring its products to the market. Although these Principles are not directly applicable to other long term commercial contracts, some of the Articles may be applied to such contracts by way of analogy where appropriate. The economic function of all three contracts is that they are instrumental in bringing products to the market. They are so called vertical agreements as they are agreements between economic actors on different levels in the production and distribution chain. Obviously the economic importance of these contracts is enormous since they form the connection between producers and retailers who sell the products to consumers and other final users. There are only very few economic sectors where producers regularly sell their products directly to final consumer users. Goodwill compensation after the ending of a distribution contract, the moment at which the agent's commission is due, the franchisor's obligation to maintain the good reputation of the network are but a few examples of issues where specific rules are needed in order to give legal practice some guidance and to provide practitioners with a reasonable degree of legal certainty. *Mechanisms to Enable Follow-On Innovation* Alina

Wernick, 2021-05-13 The patent system is based on one patent per product presumption and therefore fails to sustain complex follow on innovations that contain a number of patents. The book explains that follow on innovations may be subject to market failures such as hold ups and excessive royalties. For decades scholars have debated whether the market problems can be solved with voluntary licensing i.e. open innovation or with compulsory liability rules. The book concludes that neither approach is sufficient. On the one hand incentives to engage in open innovation practices involving patents are insufficient. On the other hand the existing compulsory liability rules in patent and competition law are not tailored to address follow on innovator's interests. To transcend this problem the author proposes a compulsory liability rule against the suppression of follow on innovation that paradoxically fosters early on voluntary licensing between patent holders and follow on innovators. The book is aimed at patent and competition law scholars and practitioners, patent attorneys, managers, engineers and economists who either engage in open innovation involving patents or conduct research on the topic. It also offers insights to policy and law makers reviewing the possibilities to foster open innovation initiatives or adapt the scope of patent remedies or employ compulsory licenses for patents. **IP and Antitrust: An Analysis of Antitrust Principles Applied to**
