Hawthorne's Visual Artists and the Pursuit of a Transatlantic Aesthetics Kumiko Mukai, 2008. Among Hawthorne's primary themes, the visual arts have usually been regarded as an afterthought and have only been examined to elucidate his own personal philosophy. Hawthorne's own contemporaries derided him for his mediocre aesthetics, and that view has been taken as received wisdom up to the present day. This study reexamines Hawthorne's aesthetics and suggests that he was much more familiar with the art and artists of the time than has previously been acknowledged by critics. He developed his own eclectic and transatlantic view of art, a view which incorporated decorative arts like embroidery while maintaining a modest estimation of his own talents. This book examines the full range of visual artists whom Hawthorne portrays. It argues that these portrayals illuminate the artist's dilemma of being fettered by New England Puritanism while at the same time being attracted to the richness and depth of both Victorian aesthetics and the artistic sense of Old World Catholicism. The ambiguous destinies of his artist characters include misunderstandings and disputes while at the same time they suggest a reconciliation of the conflicting sentiments and transatlantic perspectives of the writer himself.

Chicago's White City of 1893 David F. Burg, 2014-07-11. In 1893, the year that marked the four hundredth anniversary of the landing of Columbus in the New World, Chicago was host to an exposition to mark the occasion. Although the World's Columbian Exposition was the fifteenth world's fair, it was of vastly greater scope than any of its predecessors. Chicago created a veritable new city. It was not only larger than any previous exposition but also more elaborately designed, more precisely laid out, more fully realized, and more prophetic. It was the first exposition truly to solicit the participation of the entire world. In this study of the White City, David F. Burg shows America at a crossroads in its development. It was in the process of moving from a largely agricultural society to a predominately urban and industrial one. The exposition was an index of American values, achievements, and expectation in this era of profound and complex change. The exposition was an achievement of cooperative endeavor and expertise. It demonstrated that both artistic capacity and technology were available to transform in agreeable combination burgeoning industrial cities into well-designed centers of business, culture, and community. Burg places his discussion in the context of the United States and Chicago during the early 1890s. Besides dealing with the multifaceted fair itself, its architecture, artworks, music, technological achievements, he discusses the congresses that were held on a variety of

subjects two of the most significant being the Congresses of Women and the World's Parliament of Religions. In the exposition's theme was the potential of fashioning the Kingdom of God on earth in contrast to the chaotic dirty industrial cities of the time. Burg finds in the exposition a significant legacy to architecture, city planning and civic organization. Its most promising aftereffect occurred in the City Beautiful movement; its influence extended also to such ordinary concerns as well-lighted streets, efficient waste disposal and honest government.

The Culture and Art of Death in 19th Century America D. Tulla Lightfoot, 2019-02-21. Nineteenth-century Victorian era mourning rituals, long and elaborate public funerals, the wearing of lavishly somber mourning clothes and families posing for portraits with deceased loved ones are often depicted as bizarre or scary. But behind many such customs were rational or spiritual meanings. This book offers an in-depth explanation of how death affected American society and the creative ways in which people responded to it. The author discusses such topics as mediums as performance artists and postmortem painters and photographers and draws a connection between death and the emergence of three-dimensional media.
