**Dialogues between Art and Business** Anke Strauß, 2017-06-20 The relationship between the fine art and the business sphere has never been harmonious it has been rejected fought about ignored exploited criticised and questioned but it is still omnipresent Commonly assumed to be antagonistic situating art and the business organisation sphere in the discourses of new knowledge creation and learning however holds the potential of exploring new ways of relating the two spheres This book investigates such potentialities discussing the limits and challenges of these new

forms of relating It does so by first outlining the changing discourses of the art and business spheres and how they produce different ways of relating to their respective worlds Second it brings into conversation an ethnographic study of an art business collaboration organised by two artists with a Deleuzian concept of dialogue Dialogue here is understood as a non hierarchical encounter developing between two spheres a source of creation no longer belonging to anyone In what is here termed a machinic research framework accounting for composition and movement on all scales the book shows how making connections is a discursive and material practice with expectations and imaginaries playing a central role It also addresses the paradoxical interplays between losing control and maintaining control in collaborative attempts between reaching out for the Other and carrying out identity work and between positions in the centre and in the margins of the highly stratified and codified areas of business organisations and fine art Eventually this book examines small dialogical instances that escape the stratifying forces dividing the two worlds thereby creating a temporary space It closes with a reflection on the role of research in thinking and making new ways of relating the world of fine art and the business organisation sphere
