McKee (0d),2008 This dissertation challenges the conventional treatment of surimono as pictorial greeting announcement cards comprising a subcategory of ukiyo e a definition based on shortsighted understanding of the genre s history that derives from distorting projections of western social forms and interests onto a Japanese case By examining surimono s informing context and broader history this study redefines the genre as an early modern variation on the rich traditions of ritual and seasonal poetic presentations in Japan Such an approach allows us to understand the defining characteristics of surimono their historical development and social uses in symbolic exchanges in new ways highlighting poetry as the key component that gives these works their unique form function and semiotic significance My study begins with a history of reception contrasting surimono s treatment as art historical objects in the west from the late nineteenth century with Tokugawa period definitions I then examine the cultural background summoned up by the formats content and methods of inscription and exchange employed by surimono s makers to give significance to their form semiotically within the context of ritual poetic exchanges Showing how surimono emerged as a latterday woodblock printed version of the calligraphic poetic presentation I look in detail at early surimono from the turn of the eighteenth century only recently treated as part of this genre and especially the role of illustration in such works The nature of these initial haikai works is then contrasted with that of the better known ukiyo e illustrated ky ka surimono to reveal how poetry functions as a kind of genetic code informing every physical aspect of surimono Distinctions between word and image in surimono blur in the mutual interactions between these signifying systems The result of the broad view taken in this study which includes haikai and ky ka practices in relation to customs of composition inscription and presentation established in waka and renga is a new view of surimono as an art form defined by its poetry in which in keeping with the classical ideal of the poetic presentation the work itself becomes a material manifestation of poetic ideas tones principles and approaches to representation Abstract Art and Artifice in Visual Culture Sonia Coman,Vasile-Ovidiu Prejmerean,Michael Yonan,2024-12-30 This edited volume explores the notion of artifice in modern visual culture ranging from the eighteenth century to the present in countries around the globe Artifice has been regarded as a primarily Western phenomenon playing as it does a central role in European art theory since the Renaissance This volume proposes that artifice is better understood as a transcultural artistic phenomenon and requires far broader conceptualization across international contexts It acquaints readers with works of art

visual modes of communication and concepts originating in France Germany the United States Japan and China and includes painting sculpture drawings prints photographs film and virtual reality augmented reality VR AR objects Contributors demonstrate how practices of artifice function as both symbol and form in parallel and divergent ways in multiple cultural settings The book will be of interest to scholars working in art history visual culture and material culture Ukiyo-e Explained David Bell,2021-10-01 A great many volumes already exist on the subject of ukiyo e mostly single focus works intended to appeal to connoisseurs or art historians Ukiyo e Explained however is the first integrated study with wider scholarly appeal to show how ukiyo e is art but also social history culture and craft Indeed ukiyo e or floating world pictures form one of the most popular and widely known forms of Japanese art Their history has been well documented in the past and their distinctively decorative often sensual pictorial character is familiar to audiences around the world This study illuminates new pathways to a greater appreciation of ukiyo e by addressing the environments and conditions under which the artists worked together with the factors that determined or conditioned the peculiar stylistic character of ukiyo e It also examines the particular forces that governed this distinctive type of picture making and the corresponding development of popular tastes with the audiences of the day focusing especially on contemporary aesthetic sensibilities the ways artists learned their craft and the conditioning qualities of their medium
