The Art of Translation Kornej I. Čukovskij, 1984
Chan, 1995 **A High Art** Kornej I. Čukovskij, 1984 A Topical Bibliography of Translation and Interpretation Sin-wai Hegel, 2023-12-13

In The Philosophy of Fine Art Georg Wilhelm Friedrich Hegel delves into the intricate relationship between art philosophy and the unfolding of human spirit. Spanning three volumes, Hegel articulates a comprehensive framework that positions art as a manifestation of the Absolute Spirit evolving through historical contexts and aesthetic paradigms. His dialectical method, characterized by a synthesis of opposing ideas, presents art not merely as an object but as a dynamic process that reflects the cultural and intellectual milieu of its time. Hegel's prose, while dense and philosophical, is imbued with a passion for art that invites readers to explore the depths of beauty and meaning within cultural artifacts.

Hegel, an influential German philosopher and a key figure in German Idealism, emerged from a background steeped in history, theology, and metaphysics, which profoundly shaped his thoughts on aesthetic theory. His intellectual journey through the tumultuous political landscape of early 19th-century Europe also fed into his contemplation of art's role in societal development. Experiencing various forms of art from classical to contemporary, Hegel's observations are suffused with a belief in art's capacity to express the ethical life of its time. This seminal work is essential for both students and scholars of philosophy and the arts, providing a rich philosophical explorative ground for understanding the evolution of aesthetics. Readers seeking to unravel the complexities of art's significance within human culture will find Hegel's profound insights a compelling and transformative experience.

The Art of Translation Jiří Levý, 2011-11-22

Jiří Levý's seminal work The Art of Translation, considered a timeless classic in Translation Studies, is now available in English. Having drawn on adjacent disciplines, the methodology of Czech functional sociosemiotic structuralism, and the state of the art in the West, Levý synthesized his findings and experience in the field, presenting them in a reader-friendly book which combines the approaches of a theoretician, systemic analyst, historian, critic, teacher, practitioner, and populariser. Although focused on literary translation from theoretical, descriptive, and historical perspectives, it presents a conceptualization of a general theory addressing a number of issues discussed today. The practical mission of the book as a theory extending to practice is based on the same historical dialectic affinity of methods, norms, functions, and values, accounting for the translator's agency and other contextual agents involved in the communication process. The book will be useful to translators, researchers, students, and teachers in Translation and Literary Studies.

Mid-Century Romance John T. Connor,2024-09-13 *Mid Century Romance* chronicles a revival of the historical novel in the middle decades of the twentieth century in the cultures of British modernism and international communism Born of a national turn in world politics these novels met the turbulence of mid century history with narratives of national becoming roadmaps to situate their readers in the pattern of social change Their writers were often mindful of the genre's romantic era heritage they saw themselves as following in the footsteps of Sir Walter Scott and they drew on the same rescued remains of primitive poetry and popular antiquities that romanticism first used to construct

its versions of national identity culture and tradition This book shows how the impulse to salvage traces of ancestral culture and press them to new purpose links the mid century national historical novel to the rise of radical social history and magical realism Post war anticommunism shaped a tradition of the novel as a preserve of art and the individual Mid Century Romance counters with a different genealogy of the British and world novel whose object is society and the future of community the nation and its people It situates its cast of British writers including the modernists Hope Mirrlees and Virginia Woolf the communists Jack Lindsay and Sylvia Townsend Warner the eccentric modernist and sometime fellow traveller John Cowper Powys and the New Left luminary Raymond Williams in a transnational perspective that reaches from Bihar India to Bahia Brazil
