Museum Space Kali Tzortzi, 2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation

Spaces for Consumption Steven Miles, 2010-08-01 In Spaces for Consumption Steven Miles develops a penetrating critique of a key shift characterising the contemporary city Theoretically informed the other strength of the volume lies in the wealth of examples that are drawn upon to show how cities are becoming spaces for consumption which has itself rapidly become a global phenomenon Ronan Paddison University of Glasgow This is a great book Powerfully written and lucid it provides a thorough introduction to concepts of consumption as they relate to the spaces of cities The spaces themselves the airports the shopping malls the museums and cultural quarters are analysed in marvellous detail and with a keen sense of historical precedent And refreshingly Miles doesn't simply dismiss cultures of consumption out of hand but shows how as consumers we are complicit in and help define those cultures His book makes a major contribution to our understanding of contemporary cities but is accessible enough to appeal to any reader with an interest in this important area Richard Williams Edinburgh University Spaces for Consumption offers an in depth and sophisticated analysis of the processes that underpin the commodification of the city and explains the physical manifestation of consumerism as a way of life Engaging directly with the social economic and cultural processes that have resulted in our cities being defined through consumption this vibrant book clearly demonstrates the ways in which consumption has come to play a key role in the re invention of the post industrial city The book provides a critical understanding of how consumption redefines the consumers relationship to place using empirical examples and case studies to bring the issues to life It discusses many of the key spaces and arenas in which this redefinition occurs including shopping themed space mega events architecture Developing the notion of contrived communality Steven Miles outlines the ways in which consumption alongside the emergence of an increasingly individualized society constructs a new kind of relationship with the public realm Clear sophisticated and dynamic this book will be

Art/Museums Christine Sylvester,2015-12-03 *Art Museums* takes the study of international relations to the art museum It seeks to persuade those who study international relations to take art museums seriously and museum studies to take up the insights of international relations And it does so at a time when both international relations and art are said to be at an end that is out of control and beyond sight of their usual constituencies The book focuses on the British Museum the National Gallery of London the Museum of Iraq the Museum of Modern Art in New York the Getty museums the Guggenheim museums and museum spaces instantly created by the attacks on the World Trade Center in 2001 The art includes works over which museums might struggle acquire through questionable means hoard
