painting in luminous blue and gold Agnes Martin's Night Sea 1963 is a large canvas of hand drawn rectangular grids painted in luminous blue and gold In this illustrated study Suzanne Hudson presents the painting as the work of an artist who was also a thinker poet and writer for whom self presentation was a necessary part of making her works public With Night Sea Hudson argues Martin 1912-2004 created a shimmering realization of control and loss that stands alone within her suite of classic grid paintings as an exemplary and exceptional achievement Hudson offers a close examination of Night Sea and its position within Martin's long and prolific career during which the artist destroyed many works as she sought forms of perfection within self imposed restrictions of color and line For Hudson Night Sea stands as the last of Martin's process based works before she turned from oil to acrylic and sought to express emotions of lightness and purity unburdened by evidence of human struggle Drawing from a range of archival records Hudson attempts to draw together the facts surrounding the work which were at times obfuscated by the artist's desire for privacy Critical responses of the time give a sense of the impact of the work and that which followed it Texts by peers including Lenore Tawney Donald Judd and Lucy Lippard are presented alongside interviews with a number of Martin's friends and keepers of estates such as the publisher Ronald Feldman and Kathleen Mangan of the Lenore Tawney archive which holds correspondence between Martin and Tawney

Chow, 2025-02-14 A ground breaking guide to thinking about how routine activities can be designed and innovated to develop narrative meaning and a sense of purpose Iteration is an integral part of daily routines such as sleep wake cycles commuting workouts chores or practising an instrument While many iterations just monotonously repeat others can lead to progression or evolution With subtle variations among iterations we can create meaning out of repetitive acts forging narratives from them and thus making them meaningful to us Chow draws on rhetoric psychology narratology and design thinking to show both in theory and in practice how we can innovate the design of mundane and routine activities to give them meaning and expression He does so by examining Asian and European originated examples across a range of domains including visual arts literature digital art video games and mobile applications A must read for designers and enthusiasts looking for ways to innovate across all domains and media and transform tedious repetitive activities into acts of intention *The Revival of Beauty* Catherine Wesselinoff, 2023-08-18 This book provides original descriptive accounts of two schools of thought in the philosophy of beauty the 20th century Anti Aesthetic movement and the 21st century Beauty Revival movement It also includes a positive defence of beauty as a lived experience extrapolated from Beauty Revival position Beauty was traditionally understood in the broadest sense as a notion that engages our sense perception and embraces everything evoked by that perception including mental products and affective states This book constructs and places in parallel with one another the Anti Aesthetic and Beauty Revival movements In the author s view Anti Aestheticism is devoted to a decisive negation of beauty denying its importance as a

philosophical notion and its significance as a lived experience It suggests that beauty is a merely sensual experience which can be used at best as a distraction from justice and at worst as an instrument of evil Alternatively the Beauty Revival movement advances arguments for beauty as an experience that extends primarily to sensual experience but which also calls forth mental products and cognitive and affective states evoked by that experience After reconstructing these two positions the author elaborates on the notion of beauty as a lived experience through three key moments which occur in the process of our experiencing beautiful objects These moments are a the conditions that constitute an experience of beauty b the attitudinal features most likely to lead to the experience of beauty and c the results of the experience of beauty The Revival of Beauty will be of interest to scholars and advanced students working in aesthetics history of philosophy and art history

Art and Archive. Genealogy and Contemporaneity (1920-2010) Anna Maria Guasch, 2024-12-31 This book provides a comprehensive exploration of the relationship between art and the archive The author examines how artists have engaged with archival materials practices and methodologies throughout history from the avant garde movements of the early 20th century to contemporary artistic practices She explores the ways in which artists have appropriated transformed and recontextualized archival documents and narratives to create new meanings and perspectives on history memory and identity Guasch also discusses the role of the archive in shaping artistic production reception and historiography highlighting its significance as a site of cultural memory and knowledge production Through a series of case studies and theoretical reflections the book offers insights into the diverse ways in which artists have navigated the archive as a source of inspiration critique and intervention in the artistic process Art and Archive represents an archaeological and genealogical history of the relationships sometimes linear sometimes discontinuous between art and the archive The archive ceases to be a dusty space or a repository of historical artifacts to become an active discursive and relational system that establishes aesthetically socially and politically new relationships of temporality between past present and future in what is understood as the time of the future perfect

Theatre Noise Lynne Kendrick, David Roesner, 2012-01-24 This book is a timely contribution to the emerging field of the aurality of theatre and looks in particular at the interrogation and problematisation of theatre sound s Both approaches are represented in the idea of noise which we understand both as a concrete sonic entity and a metaphor or theoretical sometimes even ideological thrust Theatre provides a unique habitat for noise It is a place where friction can be thematised explored playfully even indulged in friction between signal and receiver between sound and meaning between eye and ear between silence and utterance between hearing and listening In an aesthetic world dominated by aesthetic redundancy and aerodynamic signs theatre noise recalls the aesthetic and political power of the grain of performance Theatre noise is a new term which captures a contemporary agitative acoustic aesthetic It expresses the innate theatricality of sound design and performance articulates the reach of auditory spaces the art of vocality the complexity of acts of audience the political in produced noises Indeed one of the key contentions of this book is that noise in most cases is to be

understood as a plural as a composite of different noises as layers or waves of noises Facing a plethora of possible noises in performance and theatre we sought to collocate a wide range of notions of and approaches to noise in this book by no means an exhaustive list of possible readings and understandings but a starting point from which scholarship like sound could travel in many directions
