Solving Modern Family Dilemmas Patricia Pitta, 2014-08-13 Context is the unifying principle that guides a therapist's formulation of the modern family's presenting dilemmas, functioning relationships and attitudes. We can no longer assume that a family is comprised of a mother, father and children; the composition and systems a family operates within can be fluid and ever changing, requiring an equally elastic model. The Assimilative Family Therapy Model is sensitive to the many unique

contexts presented by the modern family and is shaped by the inclusion of necessary interventions to address the specific dilemmas of a client or family In Solving Modern Family Dilemmas readers will learn about many schools of thought and experience their integration to help heal clients through differentiation anxiety reduction and lowering emotional reactivity There is also no need for readers to abandon their theoretical framework theories concepts and interventions can be inserted into the model enabling readers to create their own model of family therapy End of chapter questions enable self examination and readers are treated to references for further exploring theories concepts and interventions Family therapists psychologists social workers and mental health counselors find this book essential in their work with all clients and professors use it in courses to teach different modes of integrating theories concepts and interventions *Subject Guide to Books in Print* ,1997 **Families and Change** Patrick C.
