## **Blind Justice Jacobus Tenbroek And The Vision Of Equality:**

**Blind Justice** Floyd Matson, 2005-10 tenBroek 1911 1968 was a pioneer in organizing the blind to claim their constitutional rights This bio tells how he inspired a new social movement changed the landscape of opportunity for blind as well as sighted Americans At age 7 tenBroek lost his sight which changed his life but not his intrinsic qualities a brilliant mind a steel will an activist spirit He earned both doctoral law degrees but found the door to a college teaching position closed because he was blind Eventually he was offered a position at UC Berkeley where he taught for a quarter of a century He became a leader of the organized blind also fought for equality under the law for other minority groups He broke new ground in civil rights social welfare family law Photos      **Blind Justice** Floyd W. Matson, 2005 Biography of the founder of the National Federation of the Blind written by friend and collaborator Matson Tells how tenBroek 1911 1968 blinded at age seven obtained a law degree and became an advocate not only for blind people but for people with disabilities poor people and other minority groups      **We the People** Jill Lepore, 2025-09-16 NEW YORK TIMES BESTSELLER Lepore's 15th book We the People a history of the U S Constitution may be her best yet a capacious work that lands at the right moment like a life buoy as our ship of state takes on water Hamilton Cain Los Angeles Times From the best selling author of These Truths comes We the People a stunning new history of the U S Constitution for a troubling new era The U S Constitution is among the oldest constitutions in the world but also one of the most difficult to amend Jill Lepore Harvard professor of history and law explains why in We the People the most original history of the Constitution in decades and an essential companion to her landmark history of the United States These Truths Published on the occasion of the 250th anniversary of the nation's founding the anniversary too of the first state constitutions We the People offers a wholly new history of the Constitution One of the Constitution's founding purposes was to prevent change Lepore writes Another was to allow for change without violence Relying on the extraordinary database she has assembled at the Amendments Project Lepore recounts centuries of attempts mostly by ordinary Americans to realize the promise of the Constitution Yet nearly all those efforts have failed Although nearly twelve thousand amendments have been introduced in Congress since 1789 and thousands more have been proposed outside its doors only twenty seven have ever been ratified More troubling the Constitution has not been meaningfully amended since 1971 Without recourse to amendment she argues the risk of political violence rises So does the risk of constitutional change by presidential or judicial fiat Challenging both the Supreme Court's monopoly on constitutional interpretation and the flawed theory of originalism Lepore contends in this gripping and unfamiliar story of our own past that the philosophy of amendment is foundational to American constitutionalism The framers never intended for the Constitution to be preserved like a butterfly under glass Lepore argues but expected that future generations would be forever tinkering with it hoping to mend America by amending its Constitution through an orderly deliberative and democratic process Lepore's remarkable history seeks too to rekindle a sense of constitutional possibility Congressman Jamie Raskin writes that Lepore

has thrown us a lifeline a way of seeing the Constitution neither as an authoritarian straitjacket nor a foolproof magic amulet but as the arena of fierce logical passionate and often deadly struggle for a more perfect union At a time when the Constitution s vulnerability is all too evident and the risk of political violence all too real We the People with its shimmering prose and pioneering research hints at the prospects for a better constitutional future an amended America     *The Blind Need Not Apply* Ronald J. Ferguson,2007-05-01 This book has been a work in progress In the spring of 2000 I started this project and began to collect data and conduct interviews I copied every article I could find in the Journal of Visual Impairment and Blindness and its predecessors Outlook for the Blind and New Outlook for the Blind I was fortunate to locate Blindness the annual publication of the American Association of Workers for the Blind One of the greatest finds was the library at the American Foundation for the Blind The library contains dozens of volumes related to orientation and mobility Within two years I had amassed a considerable collection of resources I began working through the materials and along the way prepared some papers for various conferences A dramatic increase in administrative responsibilities as well as the tyranny of meeting grant deadlines diverted me from giving concentrated effort to this book All that changed as I reduced my workload in order to devote almost all my efforts over the past nine months to this project     *Ethics, Law, and Policy* Jerome E. Bickenbach,2012-01-03 This volume in The SAGE Reference Series on Disability explores ethical legal and policy issues of people with disabilities and is one of eight volumes in the cross disciplinary and issues based series which examines topics central to the lives of individuals with disabilities and their families With a balance of history theory research and application specialists set out the findings and implications of research and practice for others whose current or future work involves the care and or study of those with disabilities as well as for the disabled themselves The presentational style concise and engaging emphasizes accessibility Taken individually each volume sets out the fundamentals of the topic it addresses accompanied by compiled data and statistics recommended further readings a guide to organizations and associations and other annotated resources thus providing the ideal introductory platform and gateway for further study Taken together the series represents both a survey of major disability issues and a guide to new directions and trends and contemporary resources in the field as a whole     **Blind Justice** Floyd W. Matson,2005 Biography of the founder of the National Federation of the Blind written by friend and collaborator Matson Tells how tenBroek 1911 1968 blinded at age seven obtained a law degree and became an advocate not only for blind people but for people with disabilities poor people and other minority groups     *Representing the Poor* Mark Neal Aaronson,2014-04-22 An extended multifaceted case study of a kind not much found in the literature on social cause lawyering The narrative highlights the forceful presence of California Governor Ronald Reagan and the pivotal role in representing the welfare poor of Ralph Santiago Abascal a government funded legal aid attorney and social reform leader To fight Reagan s ambitious welfare policy initiatives Abascal with other legal services lawyers effected meaningful legal change In joint cause with recipient led welfare rights organizations he

relied on court litigation not in isolation but as part of an overall strategy that also involved legislative and administrative actions. The empirical landscape of this book is the contentious political and legal battle over California welfare reform in the early 1970s. Within the context of American pluralism and constitutionalism and from an analytical perspective, this study examines the professional and institutional character of group legal representation for the poor as a strategy for political empowerment and social change. While grounded in political and legal history, the study's conceptual approaches primarily draw on ideas from political science and theory about political representation and from writings in legal ethics and legal education on professional role responsibilities in the legal representation of people and the groups they are a part of. These principal thematic points emerge and are supported by prodigious empirical research, experience, and theory:

1. Social cause lawyering is a systemic necessity for the democratic and equitable functioning of our governing institutions.
2. The client constraints on the role of lawyers for groups or causes have more to do conceptually with understandings about the nature of representation than the applicability of ethical or procedural rules.
3. The political consequences of such legal advocacy are variable and potentially contradictory.

Exploring these dilemmas through the story of anti-poverty representation and reform, the author provides a meaningful context to consider the legal representation of the poor beyond mere lawsuits, legal doctrine, and the ubiquitous popular image of the welfare queen. The book also features an extended, fascinating, and telling interview with then Governor Reagan about his plans for welfare reform and the roadblocks and stories he encountered along the way. This new book develops the research and theory first documented in the author's much-cited but formally unpublished Berkeley doctoral dissertation, *Legal Advocacy and Welfare Reform: Continuity and Change in Public Relief, 1975*, which is now finally readily available worldwide in this extensive revision and fresh look at the seismic changes to welfare systems and conceptions of poverty that began in the 1970s.

Ambassadors of Social Progress Maria Cristina Galmarini, 2024-02-15

*Ambassadors of Social Progress* examines the ways in which blind activists from the Soviet Union and Eastern Europe entered the postwar international disability movement and shaped its content and its course. Maria Cristina Galmarini shows that the international work of socialist blind activists was defined by the larger politics of the Cold War and in many respects represented a field of competition with the West in which the East could shine. Yet her study also reveals that socialist blind politics went beyond propaganda. When socialist activists joined the international blind movement, they initiated an exchange of experiences that profoundly impacted everyone involved. Not only did the international blind movement turn global disability welfare from philanthropy to self-advocacy, but it also gave East European and Soviet activists a new set of ideas and technologies to improve their own national movements. By analyzing the intersection of disability and politics, *Ambassadors of Social Progress* enables a deeper, bottom-up understanding of cultural relations during the Cold War. Galmarini significantly contributes to the little-studied history of disability in socialist Europe and ultimately shows that disability activism did not start as an import from the West in the post-1989 period but rather had a long and

meaningful tradition that was rooted in the socialist system of welfare and needed to be reinvented when this system fell apart

**Human Rights in the United States** Shareen Hertel, Kathryn Libal, 2011-04-18 This book brings to light emerging evidence of a shift toward a fuller engagement with international human rights norms and their application to domestic policy dilemmas in the United States The volume offers a rich history spanning close to three centuries of the marginalization of human rights discourse in the United States Contributors analyze cases of US human rights advocacy aimed at addressing persistent inequalities within the United States itself including advocacy on the rights of persons with disabilities indigenous peoples lone mother headed families incarcerated persons lesbian gay bisexual and transgendered people and those displaced by natural disasters It also explores key arenas in which legal scholars policy practitioners and grassroots activists are challenging multiple divides between public and private spheres for example in connection with children s rights and domestic violence and between public and private sectors specifically in relation to healthcare and business and human rights

**Crippling the Archive** Jenifer L. Barclay, Stefanie Hunt-Kennedy, 2025-08-05 How do we explain the conspicuous absence of disability from the histories we write What forces and factors create this dynamic How can disability be everywhere and nowhere present and absent and obvious and overlooked in both the historical record and historians interpretations of the past Jenifer L Barclay and Stefanie Hunt Kennedy edit a collection of interdisciplinary essays that consider how and why physical sensory intellectual and psychological disabilities are underrepresented erased or distorted in the historical record The contributors draw on the methodology and practice of crippling to uncover disability in contested archives and explore ways to build inclusive archives accountable to and centered on disabled people and disability justice Throughout they show ableness informing the politics of the archive as a physical space a discriminatory record and a collection of silences An essential contribution to research methods and disability justice Crippling the Archive offers a blueprint for intersectional and interdisciplinary approaches that bridge disability studies history and archival studies
