Blind Spot Myriam Tadessé, 2021-12-01 In *Blind Spot* Myriam Tadess exposes the difficulty even the impossibility for France to truly understand and celebrate the lived realities of mixed or biracial French citizens What the French word *métis* which translates to half breed or mixed race hides is how central the notion of race actually is in a society that claims to repudiate it The French film and theatre world in which Tadess has made her career appears unable to confront the individuality of the performers They are required to correspond to categories often based on race that don't allow for biracial identities This classification not only contradicts France's asserted ideals but also views as anomalies those who defy ethno-racial assumptions Drawing on her personal experiences as a biracial Ethiopian French woman and her family history Tadess explores the realities of life for mixed race individuals in France through her searing and honest memoir Praise for *Blind Spot* Myriam Tadess's memoir combines formal innovation with a candid look back on her life and the harrowing experiences she's had with discrimination in her chosen field and in French society as a whole *Blind Spot* feels like a distillation of its author's life and a powerful testament to her day to day reality Tobias Carroll *Words Without Borders*

The Blind Spot Javier Cercas, 2018-05-03 An essential collection of literary criticism by one of Spain's most acclaimed authors Javier Cercas is one of the most enjoyable and innovative novelists at work today Well known among English language readers as the author of *Soldiers of Salamis* winner of the Independent Foreign Fictio Prize *The Anatomy of a Moment* and *The Impostor* Cercas is also Professor of Spanish Literature at the University of Girona In 2015 following in the footsteps of George Steiner Mario Vargas Llosa and Umberto Eco as Weidenfeld Visiting Professor in Comparative European Literature at St Anne's College Oxford Cercas gave a series of five lectures on the novel today which have since been revised and are now published in English for the first time as *The Blind Spot* Starting with *Don Quixote* and his own experience as a writer Cercas launches out into a consideration of the most challenging fiction of the last hundred years from Kafka Borges Perec Calvino and Kundera to Sebald Coetzee Barnes Foster Wallace and Knausg rd First he defines and celebrates certain aspects of the novel in the twenty first century which are also features of Cervantes masterpiece its essential irony and ambiguity its total commitment to innovation its natural joyful and omnivorous desire to cram the whole world within its pages and its intricate concern with fiction and

reality Then he moves on to consider the actual meaning of the novel the uncertain and discredited role of the writer as intellectual and the role of the reader in the creation of a form whose aim is to tell the truth by telling lies The result is a dazzling short book which provides a new interpretation of novel from Cervantes and Melville to the present and which will be as stimulating for readers and writers of literature in the twenty first century as E M Forster s Aspects of the Novel or Milan Kundera s The Art of the Novel were in the last Translated from the Spanish by Anne McLean **Blind Spot** ,2000

Face and Mask in a stereoscopic view Josef Plank, 2025-01-07 The art of portraiture has always fascinated us driven by a desire to capture the fleeting essence of a moment the depth of emotions and the unique character of individuals Through photography and painting we ve skillfully played with light and shadow to create two dimensional depictions of our three dimensional world Yet the experience of seeing and being seen is far richer and more layered than these flat images can convey This is where stereoscopic photography offers something extraordinary enabling us to transcend the limitations of a single plane and step into a more immersive reality Since the 19th century stereoscopy has captivated audiences bringing a unique illusion of depth and dimension by presenting two slightly offset images to the eyes Stereoscopic portraits in particular go beyond simple visual records they invite us to experience a profound closeness offering a window into a world where the subject feels nearly within reach These portraits allow us to connect across time and space engaging with individuals from the past Nefertiti for example with an intimacy that is both surprising and enchanting Each image is a moment frozen in time vividly revealing expressions attire and surroundings in stunningly lifelike detail This book is a tribute to the artistry technical ingenuity and historical significance of stereoscopic portrait photography As you turn each page prepare to be transported to another era an era that through the lens of stereoscopy feels startlingly present These images are not just glimpses into the past they are a testament to the brilliance of a technique that bridges the gap between viewer and subject Whether you are a seasoned enthusiast or new to the stereoscopic art the portraits in this collection celebrate the enduring relationship between image and reality allowing us to share an experience that defies time In these images the background plays a supporting role often softened or blurred to maintain focus on the person Unlike panoramic or landscape 3D photography where the environment dominates the image stereoscopic portraits use depth to bring the individual to the foreground making them the undeniable center of attention The goal is not to dazzle with technology but to capture the essence of a person making each portrait not just an image but a powerful face to face encounter Stereoscopic portraiture is about simplicity and connection The technique relies on just two slightly offset images imitating the natural perspective of our eyes This straightforward method makes stereoscopic portraits accessible while still delivering a striking sense of presence and dimension In a field often dominated by complex equipment and high tech visuals stereoscopic portraits return

to the essentials of human interaction the shared experience of looking into another's eyes In short stereoscopic portraits stand apart in the world of 3D photography They focus on the human subject offering a natural realism that evokes an emotional rather than purely visual response Rooted in classic traditions yet enhanced by the immersive quality of 3D these images are about capturing not just what we see but what we feel I invite you to dive into this stereoscopic journey Starting with the Amarna period in Ancient Egypt around 1340 BCE Nefertiti moving through the Hellenistic era between 160 and 20 BCE Laocoön Group we arrive at the Age of Enlightenment with figures like Emanuel Kant The diversity of the 20th century is captured through portraits ranging from Willy Brandt and Samuel Beckett to Wim Wenders Kate Winslet director and actress of 3D movies *United States Army Aviation Digest*, 1971
