Simming Scott Magelssen,2014-05-12 How simulated experiences from living history to emergency preparedness drills create meaning in performance **Modern Mexican Culture** Stuart A. Day,2017-10-31 This collection of essays presents a key idea or event in the making of modern Mexico through the lenses of art and history Provided by publisher **Staging Nationalism** Kiki Gounaridou,2005-05-05 When a nation wants to reconnect with a sense of national identity its cultural celebrations including its theatre are often tinged with nostalgia for a cultural high point in its history Leaders often try to create a neo classical cultural identity Artificially returning to an imagined pinnacle however can fail to take into account new aspects of national identity such as the infusion of other cultures and languages This collection of essays discusses the relationship between political power and the construction or subversion of cultural identity The collection takes a wide historical perspective from distinct periods and cultures from all over the world A few of the topics examined include how theatre in 18th century Poland tried to reconstitute the identity of an imagined classical heritage clung to by Polish nobles how festival practices during the French Revolution tried to give meaning to recent events and rein in anxiety about split loyalties how Athenian prologues cemented early American culture how romantic admiration of peasant culture spread from

Germany throughout Europe how Greek tragedy in postwar Japan reflects the conflict of Japan's imposed identity as a Western style democracy with its prewar identity as a samurai nation and how Mexican archeological performance links the indigenous past with a post revolutionary identity as a mixed race country

Photopoetics at Tlatelolco Samuel Steinberg, 2016-01-15 In the months leading up to the 1968 Olympic games in Mexico City students took to the streets calling for greater democratization and decrying crackdowns on political resistance by the ruling PRI party During a mass meeting held at the Plaza of the Three Cultures in the Tlatelolco neighborhood paramilitary forces opened fire on the gathering The death toll from the massacre remains a contested number ranging from an official count in the dozens to estimates in the hundreds by journalists and scholars Rereading the legacy of this tragedy through diverse artistic political interventions across the decades Photopoetics at Tlatelolco explores the state's dual repression both the massacre's crushing effects on the movement and the manipulation of cultural discourse and political thought in the aftermath Examining artifacts ranging from documentary photography and testimony to poetry essays chronicles cinema literary texts video and performance Samuel Steinberg considers the broad photographic and photopoetic nature of modern witnessing as well as the specific elements of light gunfire flares camera flashes that ultimately defined the massacre Steinberg also demonstrates the ways in which the labels of massacre and sacrifice inform contemporary perceptions of the state's blatant and violent repression of unrest With implications for similar processes throughout the rest of Latin America from the 1960s to the present day Photopoetics at Tlatelolco provides a powerful new model for understanding the intersection of political history and cultural memory

Edible Identities: Food as Cultural Heritage Ronda L. Brulotte, 2016-04-29 Food its cultivation preparation and communal

consumption has long been considered a form of cultural heritage. A dynamic living product, food creates social bonds as it simultaneously marks off and maintains cultural difference. In bringing together anthropologists, historians, and other scholars of food and heritage, this volume closely examines the ways in which the cultivation, preparation, and consumption of food is used to create identity claims of cultural heritage on local, regional, national, and international scales. Contributors explore a range of themes, including how food is used to mark insiders and outsiders within an ethnic group, how the same food's meanings change within a particular society based on class, gender, or taste, and how traditions are invented for the revitalization of a community during periods of cultural pressure. Featuring case studies from Europe, Asia, and the Americas, this timely volume also addresses the complex processes of classifying, designating, and valorizing food as *terroir*, slow food, or as intangible cultural heritage through UNESCO. By effectively analyzing food and foodways through the perspectives of critical heritage studies, this collection productively brings two overlapping but frequently separate theoretical frameworks into conversation.

Prizefighting and Civilization David C. LaFevor, 2020-05-01 In *Prizefighting and Civilization: A Cultural History of Boxing, Race, and Masculinity in Mexico and Cuba, 1840-1940*, historian David C. LaFevor traces the history of pugilism in Mexico and Cuba from its controversial beginnings in the mid-nineteenth century through its exponential rise in popularity during the early twentieth century. A divisive subculture that was both a profitable blood sport and a contentious public spectacle, boxing provides a unique vantage point from which LaFevor examines the deeper historical evolution of national identity, everyday normative concepts of masculinity and race, and an expanding and democratizing public sphere in both Mexico and Cuba, the United States' closest Latin American neighbors. *Prizefighting and Civilization* explores the processes by which boxing, once considered an outlandish purveyor of low culture, evolved into a nationalized pillar of popular culture, a point of pride that transcends gender, race, and class.

Mexico in Transition Gerardo Otero, 2013-07-04 *Mexico in Transition* provides a wide-ranging empirical and up-to-date survey of the multiple impacts neoliberal policies have had in practice in Mexico over twenty years, and the specific impacts of the NAFTA Agreement. The volume covers a wide terrain, including the effects of globalization on peasants, the impact of neoliberalism on wages, trade unions, and specifically women workers; the emergence of new social movements, *El Barzán*, and the Zapatistas (EZLN); how the environment, especially biodiversity, has become a target for colonization by transnational corporations; the political issue of migration to the United States; and the complicated intersections of economic and political liberalization. *Mexico in Transition* provides rich, concrete evidence of what happens to the different sectors of an economy, its people, and natural resources as the profound change of direction that neoliberal policy represents takes hold. It also describes and explains the diverse forms of resistance and challenge that different civil society groups of those affected are now offering to a model the downsides of which are becoming increasingly manifest.
