Blue Eyes Better:

The Price a Woman Pays Edgar Wallace, 2023-01-05 While Wallace could never be accused of being a run of the mill author *The Price a Woman Pays* is one of his more unusual tales A gripping and fun short story it follows the concerns of Dr Beechington who down on his luck wants to ensure that his daughter marries into money Will she follow his request or go her own way An unexpected religious twist sets this story apart from the majority of Wallace's works Fast paced and with a liberal sprinkling of wry humour this is an ideal read for Wallace fans or those who want an introduction to his writing Born in London Edgar Wallace 1875-1932 was an English writer so prolific that his publisher claimed that he was responsible for a quarter of all books sold in England Leaving school at the age of 12 Wallace made his first steps into the literary world by selling newspapers on the corner of Fleet Street He worked as a war correspondent after joining the army at age 21 which honed his writing abilities This led to the creation of his first book *The Four Just Men* Wallace is best remembered as the co-creator of *King Kong* which has been adapted for film 12 times most notably directed by *Lord of the Rings* director Peter Jackson and starring Jack Black and Naomi Watts However he leaves behind an extensive body of work including stories such as *The Crimson Circle* and *The Flying Squad*

Gore On Stage John Franceschina, 2004-11-23 It is a generally accepted fact that in the first half of the nineteenth century Catherine Gore became the most prolific if not most popular writer of fashionable novels in England It is less well known that Mrs Gore's 200 volume output included eleven extremely popular if not always critically successful plays performed at all three of the Theatres Royal in London Drury Lane Covent Garden and the Haymarket While several of the plays held the stage in England and the United States well into the second half of the nineteenth century modern critical appraisals of the works have been hampered by the lack of available texts *Gore on Stage* for the first time provides performance texts of all of Mrs Gore's work for the stage including original cast lists critical responses illustrations and glossaries of foreign words and nineteenth century jargon Students of drama and nineteenth century literature will delight in the intricacies of plot and theatrical effects in this collection of historical melodramas comedies of manners and farces and they will marvel at the contemporary nature of the plays themes trading on a balance of power between male and female characters

The poetical works of Thomas Moore, with life Thomas Moore, 1881 Living Color Nina G. Jablonski, 2014-10-17 This book investigates the social history of skin color from prehistory to the present, showing how our body's most visible trait influences our social interactions in profound and complex ways. The author begins with the biology and evolution of skin pigmentation, explaining how skin color changed as humans moved around the globe. She explores the relationship between melanin pigment and sunlight and examines the consequences of rapid migrations, vacations, and other lifestyle choices that can create mismatches between our skin color and our environment. Richly illustrated, this book explains why skin color has come to be a biological trait with great social meaning, a product of evolution perceived by culture. It considers how we form impressions of others, how we create and use stereotypes, how negative stereotypes about dark skin developed and have played out through history. Offering examples of how attitudes about skin color differ in the U.S., Brazil, India, and South Africa, the author suggests that a knowledge of the evolution and social importance of skin color can help eliminate color-based discrimination and racism.

Psychology is part of everyone's experience it influences the way we think about everything from education and intelligence to relationships and emotions advertising and criminality People readily behave as amateur psychologists offering explanations for what people think feel and do But what exactly are psychologists trying to do What scientific grounding do they have for their approach This book provides an understanding of some of psychology's leading ideas and their practical relevance making it a stimulating introduction for anyone interested in understanding the human mind ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable Narrative Conventions and Race in the Novels of Toni Morrison Jennifer Lee Jordan Heinert, 2012-11-12 This study analyzes the relationship between race and genre in four of Toni Morrison's novels The Bluest Eye Tar Baby Jazz and Beloved Heinert argues how Morrison's novels revise conventional generic forms such as bildungsroman folktales slave narratives and the formal realism of the novel itself This study goes beyond formalist analyses to show how these revisions expose the relationship between race conventional generic forms and the dominant culture Morrison's revisions critique the conventional roles of African Americans as subjects of and in the genre of the novel and re write roles which instead privilege their subjectivity This study provides readers with new ways of understanding Morrison's novels Whereas critics often fault Morrison for breaking with traditional forms and resisting resolution in her novels this analysis shows how Morrison's revisions shift the narrative truth of the novel from its representation in conventional forms to its interpretation by the readers who are responsible for constructing their own resolution or version of narrative truth These revisions expose how the dominant culture has privileged specific forms of narration in turn these forms privilege the values of the dominant culture Morrison's novels attempt to undermine this privilege and rewrite the canon of American literature
