Senger, 2012-12-06 Investigations on the specific effects of blue light on plants began some fifty years ago In recent years the growing awareness of blue light induced phenomena in plants microorganisms and animals has accelerated and expanded this research into an ever increasing variety of blue light effects in biological systems In 1977 J A Schiff and W R Briggs proposed a specific meeting to present and summarize the various blue light effects and to discuss their mechanisms and possible photoreceptors In view of the variety of responses and the range of organisms affected by blue light the term Blue Light Syndrome seemed to be the only appropriate one for the meeting With the help of the International Advisory Committee W R Briggs Stanford J Gressel Rehovot W Kowallik Bielefeld S Miyachi Tokyo W Rau Munich and J A Schiff Waltham and the very generous financial support provided by the Deutsche Forschungsgemeinschaft as well as by the Bundesministerium für Forschung und Technologie the Kultusminister des Landes Hessen and the Philipps Universität Marburg the International Conference on the Effect of Blue Light in Plants and Microorganisms was held in July 1979 in the Philipps Universität Marburg **West coast of Hindostan [afterw.] India pilot. 1st- ed. Senger, 2012-12-06 Four years ago The Blue Light Syndrome was published as the Proceedings of the 1st International Conference on the Effect of Blue Light in Plants and Microorganisms Subsequently the interest in this fascinating and growing field of research has further increased as is reflected by numerous publications Blue light effects cover such a wide spectrum of organisms responses and methods that communication among scientists with backgrounds in biology biochemistry and biophysics is particularly necessary These facts not only justified but demanded calling the Blue Light Family together again In spite of many financial problems the second conference attracted 113 active members from 19 countries The 2nd International Conference on The Effect of Blue Light in Plants and Microorganisms was held in July 1984 like the first at the University of Marburg The organizer could again rely on the help of the International Advisory Committee W Briggs Stanford M Furuya Tokyo J Gressel Rehovot S Miyachi Tokyo W Rau München J Schiff Waltham P S Song Lubbock The very generous financial assistance from the DFG and the support of the Philipps Universität Marburg and its Sonderforschungsbereich Zellenergetik and Zelldifferenzierung were the prerequisites to organizing the conference The present book consists of 56 original papers The partitioning into

eight chapters is always a problem The grouping of different aspects of the papers into these chapters has not always been obvious so that one or the other contribution could possibly fit in another chapter
