Agency, Change and Learning Julian Randall,Bernard Burnes,2023-12-05 Despite the plethora of books on change there appears a notable gap in the field rarely is the authentic and candid voice of change agents heard How often do academics or practitioners candidly state what they actually do when they are faced with managing change in their own organisations or when they are called on in a consultancy capacity In this new book the editors bring together a diverse group of contributors who have worked as Internal Change Agents in organizations to divulge what they really do and think about change The authors draw on their own research work involving change agents and their change interventions and include current reflections on the post Covid world of work and the change required for achieving change interventions successfully Each contribution offers perspectives from real change programmes in both the public and private sector offering a unique opportunity to move beyond theory and understand change in practice The book offers valuable insights for academics and students of organisational change and behaviour leadership and organisational development

Towards Universality Richard Padovan,2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier s creations was a self contained universe within a clear frame while Mies fluctuated between these two perspectives

Locus Solus Selen Ansen,Süreyya Evren,2022-06-01 Arter initiated a new publication series ARTER BACKGROUND in 2019 to accompany exhibitions drawn from its collection which holds more than 1 400 works of art The fourth book of the series accompanies Locus Solus which brings together selected works from the Arter Collection with several large scale installations including site specific new productions with an aim to explore the idea of nature through the lens of facts fictions and emotions In the book excerpts of textual and visual contents selected around the ideas active in the curatorial process of the exhibition are complemented by new works produced specifically for this context While the exhibition curated by Selen Ansen deals with the ways in which nature and culture permeate and affect each other the accompanying publication through its distinctive editorial structure features texts pointing towards extinct territories subconscious landscapes foreign lands fictive rooms heres elsewheres and nowheres wonderlands heavenly earthly and subterranean realms alongside commissioned essays by Sena Ba z Pascal Janovjak and Su Pola This book reflects the exhibition which it accompanies and whose spaces and reflections on the idea of nature it extends It amounts to a territory the contours of which are fluid semi autonomous inhabited by a variety of spaces and times One may peruse it while sitting standing or lying down in broad daylight or when the night has fallen in clear or foul weather in or outdoors just as one would with any other book that fell into one s hands One will probably make one s way into it unaccompanied since it is customary to read alone and in silence Once inside it will be preferable to keep one s eyes open in order to understand where one sets foot yet not to neglect to close them so as to be able to wander off beyond its borders This neither too long neither too short book is also a body a hybrid body composed of heterogeneous worlds and points of view assembled according to the good neighbour principle so cherished by Aby Warburg It compiles fragments of texts uprooted from their original context some of which are published as a whole others devised within the framework of the exhibition It also contains images some

speechless others quite talkative which again have been deterritorialised moved out of their original context in order to become reterritorialised in new surroundings One will find less theory here than fiction fewer essays than narrations versified poetry and free prose a manifesto dictionary and encyclopaedia pages more solitude than crowds more vegetation than concrete at least as many unspoken as vocalised thoughts Selen Ansen with contributions by Sena Ba z John Berger Jen Bervin Karl Blossfeldt Richard Brautigan Charles Burns Joseph Conrad Julio Cort zar Karel apek Evliy elebi Ferit Edg Helmut Eisendle Gianni Guadalupi Marlen Haushofer Robert Hooke Pascal Janovjak Kamo no Ch mei Gizem Karaka Tetsumi Kudo D H Lawrence Leo Lionni Lucretius Maurice Maeterlinck Xavier de Maistre Alberto Manguel Winsor McCay Claudio Morandini Murathan Mungan Bar Pirhasan Pliny the Elder Su Pola Robert Pufleb Jochen Rai Iv n Repila Raymond Roussel Nadine Schlieper Carl Seelig Gertrude Stein Michel Tournier Robert Walser Aby Warburg Lynd Ward Volkan Yalazay **The Writing Family of Stephen King** Patrick McAleer,2014-01-10 This work examines Stephen King s position in popular literary circles and then considers the contributions of his family to the landscape of contemporary fiction Though they have to a degree been eclipsed by Stephen King s popularity his wife Tabitha King and sons Owen King and Joe Hill have found varying levels of success in their own right The three have traveled their own writing paths from supernatural fiction to contemporary literary fiction This is the first extended exploration of the works of three authors who have too long been overshadowed by their proximity to the King of Horror Thinking Architecturally Paul Righini,2000 Through a critical study of issues such as order form space style place making aesthetics and architectural theory students are encouraged to think about their own creative ideas The use of analytical reasoning lateral thinking drawing and modelling is emphasised

Children's Early Understanding of Mind Charlie Lewis,Peter Mitchell,2014-03-18 A major feature of human intelligence is that it allows us to contemplate mental life Such an understanding is vital in enabling us to function effectively in social groups This book examines the origins of this aspect of human intelligence The five sections attempt firstly to place human development within an evolutionary context focusing on the possibility of innate components of understanding The second aim of the book is to examine the roles of early perception pretence and communication as precursor skills in the development of a grasp of mental states Thirdly attention is given to the possibility that children know a good deal more about the mind than is apparent from many studies designed to probe their abilities Taken together the chapters in this book mark a new focus within a theory of mind movement examining a group of skills in infancy and early childhood which culminate towards the end of the preschool period in a more mature understanding of one s and others mental states Drawing together researchers from diverse theoretical positions the aim is to work towards a coherent and unified account of this fundamental human ability This book will be of central relevance to psychologists and those in related disciplines particularly education and philosophy **The Complete Works of Gertrude Stein. Illustrated** Gertrude Stein,2025-05-27 The Complete Works of Gertrude Stein thoughtfully illustrated provides a comprehensive glimpse into the literary and

artifacts to detailed case studies like the Hope Diamond and Tutankhamun's Tomb analyzing how legends and documented events contribute to their cursed reputations. It further delves into psychological phenomena such as confirmation bias and the nocebo effect illustrating how our minds can shape our experiences. By adopting a balanced and analytical approach *Cursed Artifacts* provides a thought provoking exploration of the human relationship with objects and the stories we tell about them. *With My Heart in My Mouth* Paul Matthews, 1994 This is a fascinating and varied collection of modern poems written by people from very diverse backgrounds and experience who seek a view of the world that reaches beyond a wholly materialistic one.
