Blue Peter Ninth:

Nine Years Old M. Pollak, 2012-12-06 In 1972 Dr Margaret Pollak published her book *Today's Three Year Olds* in London This was a sensitive study of family life and the social environment of a large number of London children together with an account of their developmental assessment by various test methods She showed that variations of developmental performances were more closely related to the quality of family life than to social and economic factors Dr Pollak has now re investigated the same children at nine years of age and this book is a record of her findings The differences in development which were noted at three years of age remain in the older children Those children who at three years of age were underachievers particularly in verbal and adaptive abilities are the children who at nine years can still be identified by lower achievement at school These results must be of important relevance to educationalists and all concerned with the psychologists as well as to paediatricians welfare of children We must all be disturbed by the failure of any children in our urban city centres to benefit from education and our anxieties must be heightened if amongst the underachievers there are particular groups who can be identified by their ethnic identities In Britain education in school occupies a relatively small part of a child's life Dr Pollak has identified some of the factors in a child's wider experience and especially in the total home environment which are associated with the persistence of inferior performance

It Came From Outer Space Wearing an RAF Blazer! Martin Mobberley, 2013-07-23 To British television viewers the name Patrick Moore has been synonymous with Astronomy and Space Travel since he first appeared on *The Sky at Night* in 1957 To amateur astronomers he has been a source of inspiration joy humour and even an eccentric role model since that time Most people know that his 55 years of presenting *The Sky at Night* is a world record but what was he really like in person What did he do away from the TV cameras in his observatory and within the British Astronomical Association the organisation that inspired him as a youngster Also precisely what did he do during the War Years a subject that has always been shrouded in mystery Martin Mobberley a friend of Patrick Moore's for 30 years and a former President of the British Astronomical Association has spent ten years exhaustively researching Patrick's real life away from the TV cameras His childhood RAF service tireless voluntary work for astronomy and charity and his endless book writing are all examined in detail His astronomical observations are also examined in unprecedented detail along with the battles he fought along the way and his hatred of bureaucracy and political correctness No fan of Sir Patrick Moore can possibly live without this work on their bookshelf
