Butler,Jane Dixon,Anthony G. Capon,2015-07-31 This book has three main goals The first is to celebrate the work of a great public health figure the late A J Tony McMichael 1942 2014 The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment human institutions and behaviours a broad approach championed by Tony The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health from a foundation of objective scholarship The book s foreword and 38 chapters were written by people who were inspired by Tony many of whom worked with him at some point in the last 40 years Its structure reflects five major public health domains each of which Tony made major contributions to in an extremely productive academic life occupational health and safety environmental and social epidemiology nutrition and food systems climate change and health and ecosystem change and infectious disease The final section Transformation is dedicated to Tony s desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing Each section contains at least one key publication involving Tony There is also a selection of artworks from an exhibition which formed part of the conference held to honour Tony at The Australian National University in 2012 This conference formed the first part of Tony s festschrift completed by this book **Fiji Blue Book** Fiji,1915 **The Nature of Intelligence** Lauren B. Resnick,2024-03-08 In the 1960s and early 1970s converging scientific and social movements had generated increasing concern over the meaning of the term intelligence Traditional definitions rooted in the history of intelligence testing and school selection practices had come under challenge as experimental psychology turned increasingly to the study of human cognitive processes and as understanding of the influence of culture on

patterns of thinking grew Originally published in 1976 the theme of the book is an examination of cognitive and adaptive processes involved in intelligent behavior and a look at how these processes might be related to tested intelligence The book contains sections on intelligence from the psychometric viewpoint computer simulations of intelligent behavior studies of intelligence as social and biological adaptation and intelligence analyzed in terms of basic cognitive processes In a number of the chapters the constructs and methods of modern information processing psychology are used in their analyses of intelligence As the reader will discover the divisions of the book do not necessarily represent competing viewpoints but rather multiple windows on the phenomenon of human intelligence Today it can be read and enjoyed in its historical context
