Reusing Online Resources Allison Littlejohn, 2003-12-16 To improve the cost effectiveness and sustainability of e learning, many national and international initiatives are pioneering new ways in which educators can share their curricula with teachers and learners around the world. To enable this global sharing, educators must learn to design, manage and implement reusable electronic educational resources. This unique book outlines approaches to sharing and reusing resources for e learning. Drawing upon research by 30 prominent scholars from seven countries, the authors offer multiple perspectives from school, continuing and higher education as well as industry. It is essential reading for those implementing e learning in education and corporate training, including teachers, trainers, academics, educational developers and support staff as well as senior managers.

Measuring and Visualizing Learning in the Information-Rich Classroom Peter Reimann, Susan Bull, Michael Kickmeier-Rust, Ravi Vatrapi, Barbara Wasson, 2015-11-19 Integrated information systems are increasingly used in schools and the advent of the technology rich classroom requires a new degree of ongoing classroom assessment. Able to track web searches, resources used, task completion time and a variety of other classroom behaviors, technology rich classrooms offer a wealth of potential information about teaching and learning. This information can be used to track student progress in languages, STEM and in 21st Century skills, for instance. However, despite these changes, there has been little change in the kind of data made available to teachers, administrators, students and parents. *Measuring and Visualizing Learning in the Information Rich Classroom* collects research on the implementation of classroom assessment techniques in technology enhanced learning environments. Building on research conducted by a multinational and multidisciplinary team of learning technology experts and specialists from around the globe, this book addresses these discrepancies. With contributions from major researchers in education technology, testing and assessment and education psychology, this book contributes to a holistic approach for building the information infrastructure of the 21st
