Arkheologicheskie Vesti No 9:

Xiongnu Bryan K. Miller, 2024 This book raises the case of the world's first nomadic empire the Xiongnu as a prime example of the sophisticated developments and powerful influence of nomadic regimes Launching from a reconceptualization of the social and economic institutions of mobile pastoralists the collective chapters trace the course of the Xiongnu Empire from before its initial rise traversing the wars that challenged it and the reformations that made it stronger to the legacy left after its eventual fall Xiongnu expounds the economic practices and social conventions of steppe herders as fertile foundations for institutions and infrastructure of empire and renders a model of empires of mobilities which engaged the control less of towns and territories and more of the movements of communities and capital to fuel their regimes By weaving together archaeological examinations with historical investigations Bryan K Miller presents a more complex and nuanced narrative of how an empire based firmly in the steppe over two thousand years ago managed to formulate a robust political economy and a complex political matrix that capitalized on mobilities and alternative forms of political participation and allowed the Xiongnu to dominate vast realms of central Eurasia and leave lasting geopolitical effects on the many worlds around them

Inner Asia and the Spatial Politics of Empire William Honeychurch, 2014-11-05 This monograph uses the latest archaeological results from Mongolia and the surrounding areas of Inner Asia to propose a novel understanding of nomadic statehood political economy and the nature of interaction with ancient China In contrast to the common view of the Eurasian steppe as a dependent periphery of Old World centers this work views Inner Asia as a locus of enormous influence on neighboring civilizations primarily through the development and transmission of diverse organizational models technologies and socio political traditions This work explores the spatial management of political relationships within the pastoral nomadic setting during the first millennium BCE and argues that a culture of mobility horse based transport and long distance networking promoted a unique variant of statehood Although states of the eastern steppe were geographically large and hierarchical these polities also relied on techniques of distributed authority multiple centers flexible structures and ceremonialism to accommodate a largely mobile and dispersed populace This expertise in spatial politics set the stage early

on for the expansionistic success of later Asian empires under the Mongols and Manchus Inner Asia and the Spatial Politics of Empire brings a distinctly anthropological treatment to the prehistory of Mongolia and is the first major work to explore key issues in the archaeology of eastern Eurasia using a comparative framework The monograph adds significantly to anthropological theory on interaction between states and outlying regions the emergence of secondary complexity and the growth of imperial traditions Based on this approach the window of Inner Asian prehistory offers a novel opportunity to investigate the varied ways that complex societies grow and the processes articulating adjacent societies in networks of mutual transformation

Nomads as Agents of Cultural Change Reuven Amitai, Michal Biran, 2014-12-31 Since the first millennium BCE nomads of the Eurasian steppe have played a key role in world history and the development of adjacent sedentary regions especially China India the Middle East and Eastern and Central Europe Although their more settled neighbors often saw them as an ongoing threat and imminent danger barbarians in fact their impact on sedentary cultures was far more complex than the raiding pillaging and devastation with which they have long been associated in the popular imagination The nomads were also facilitators and catalysts of social demographic economic and cultural change and nomadic culture had a significant influence on that of sedentary Eurasian civilizations especially in cases when the nomads conquered and ruled over them Not simply passive conveyors of ideas beliefs technologies and physical artifacts nomads were frequently active contributors to the process of cultural exchange and change Their active choices and initiatives helped set the cultural and intellectual agenda of the lands they ruled and beyond This volume brings together a distinguished group of scholars from different disciplines and cultural specializations to explore how nomads played the role of agents of cultural change The beginning chapters examine this phenomenon in both east and west Asia in ancient and early medieval times while the bulk of the book is devoted to the far flung Mongol empire of the thirteenth and fourteenth centuries This comparative approach encompassing both a lengthy time span and a vast region enables a clearer understanding of the key role that Eurasian pastoral nomads played in the history of the Old World It conveys a sense of the complex and engaging cultural dynamic that existed between nomads and their agricultural and urban neighbors and highlights the non military impact of nomadic culture on Eurasian history *Nomads as Agents of Cultural Change* illuminates and complicates nomadic roles as active promoters of cultural exchange within a vast and varied region It makes available important original scholarship on the new turn in the study of the Mongol empire and on relations between the nomadic and sedentary worlds
