The International Politics of Authoritarian Rule Oisín Tansey, 2016 Autocrats must overcome a range of challenges as they seek to gain and maintain political power including the threat that comes from both rival elites and discontented publics The International Politics of Authoritarian Rule examines the ways in which international forces can encourage and assist autocratic actors in overcoming these challenges Often autocratic incumbents are strengthened in power by events on the international stage and by the active support of international allies The book offers a typology of different international forms of influence on authoritarianism and examines the ways in which external forces shape autocratic rule at the domestic level The typology distinguishes between three broad forms of international influence passive influences unintended consequences and active forms of external autocratic sponsorship The book focuses in particular on the latter category and examines intentional autocratic sponsorship in the post Cold War period A central contribution of the book is to address the question of how international autocratic sponsorship can bolster authoritarian rule It highlights the ways in which international sponsorship can contribute to authoritarian practices in three significant ways by increasing the likelihood that authoritarian regimes will pursue authoritarian practices such as coups repression or election fraud by contributing to the implementation of those practices and finally by shielding autocratic actors from international punishment after such practices are pursued External sponsorship can thus lower the costs of authoritarian behaviour and protect and shield authoritarian regimes from the negative consequences of their actions Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford **The Handbook of European Defence Policies and Armed Forces** Hugo Meijer, Marco Wyss, 2018 This volume provides the first geographically and thematically comprehensive study of the evolution and current state of the national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and security partnerships of European armed forces Survival: Global Politics and Strategy (February-March 2020): Deterring North Korea 0 The

The Revolutionary Guards in Iranian Politics Bayram Sinkaya, 2015-06-19 The Islamic Revolutionary Guards Corps IRGC has been dubbed the kingmaker in recent studies of Iranian politics precipitating heated debates surrounding the potential militarization of the Iranian regime and giving rise to paradoxical understandings of the IRGC whether as a military institution entering politics or a political institution with a military history Revolutionary Guards in Iranian Politics offers a way out of this paradox by showing that the IRGC is not a recently politicized institution but has

instead been highly politicized since its inception It identifies the ways in which the IRGC relates to national political dynamics examines the factors contributing to this relationship and its implications on Iranian politics from the revolution up to the present day The book examines the three decades following the revolution uncovering the reasons behind the rise of the Revolutionary Guards and tracking the organization s evolving relationship with politics Establishing a theoretical framework from revolution and civil military relations theories this book provides new perspectives on the relationship between the IRGC and Iranian politics This book would be of interest to students and scholars of Middle East Studies and Iranian Studies in particular Iranian Politics Defence Modernization, Secret Deals, and Strategy of Nations Attar

Stevenson,2022-08-01 Overseas military bases have been the bedrock of the United States ability to project military power exert political influence and deter potential adversaries since the Second World War But fatigue with America s forever wars as well as more nuanced financial and strategic reasons has inclined the public and policy community to favour reducing US global military activities and overseas presence In this Adelphi book Jonathan Stevenson argues that this desire does not necessarily translate into sound strategy Overseas bases are a key element of the reassurance required to resurrect and bolster America s reputation among its allies and adversaries Meanwhile strategic imperatives and geopolitical realities impose restraints in every theatre The fluidity prevailing in the Middle East and Indo Pacific counsels maintaining forward deployed forces there at roughly the current level Russia s confrontational posture towards NATO and invasion of Ukraine as well as NATO s short and medium term reliance on US capabilities require the American presence in Europe to increase and expand eastward The US should not commit itself to a foreign policy that is heavy on forward deployed military power and light on diplomacy But paradoxically reducing forward military presence may not be consistent with a policy that is less focused on military power as a means of achieving stability and security Government Reports Announcements ,1974

Educating America's Military Joan Johnson-Freese,2013-02-11 This book offers a detailed examination of the professional military education system in the United States from a critical insider s perspective The mission of America s war colleges is to educate senior military officers in both the ways of war and the defence of peace But are these colleges doing the best job possible in carrying out that important mission Military education faces many demands including a lack of preparation by the students uneven quality of the faculty and confusion over the curriculum Many officers attend resident programs at the war colleges programs against the career advice of their leadership despite the fact that they are virtually guaranteed graduation after less than a year of study while others do their best to avoid it entirely As the professional military education system has come under increasing scrutiny and criticism some have even called for closing the war colleges That answer however does not serve the United States well especially in a complex globalized environment where

military leaders need the best specialized education to prepare them for their future challenges This volume examines the system that created and supports the perpetuation of this system and why it is imperative that it be fixed Written by a faculty member at a military college with twenty years experience of the PME system this book will of much interest to students of the US Military US politics and military education in general U.S. Overseas Bases : Present Status and Future Prospects United States. Department of the Army,1963 **Military Strategies of the New European Allies** Håkan Edström,Jacob Westberg,2022-12-30 This book analyses how and to what extent ex communist states have adjusted their defence strategies since joining the EU and NATO and how differences and similarities between their strategies can be explained Between 1999 and 2013 four phases of enlargement took place when the European Union EU and NATO allowed 11 new former communist states to enter both organisations These states share some common attributes and experiences related to strategic culture and common experiences during the Cold War era that can potentially explain similarities in behaviour and preferences among them However the strategic adjustments among these states are far from uniform In an effort to explain these differences the book introduces three intervening variables 1 differences in relative power and position in the international system 2 national geographical characteristics and 3 historical experiences related to formative periods of state building processes as well as wars and armed conflicts Empirically the book strives to present and analyse the defence strategies of each of the new allies by conducting a structured focused comparison of official strategic documents from the twenty first century for each of the 11 cases Theoretically and methodologically it introduces an analytical framework enabling us to explain both similarities and differences in the formulation of the strategies of the 11 states and to shed light on their external and internal efforts to promote their strategic interest by operationalising the dependent variable defence strategy The analytical framework combines elements of structural realism with classical realism and constructivist research on unit level characteristics related to relative power and perceptions of strategic exposure This book will be of much interest to students of strategic studies European Union policy NATO and International Relations in general
