expertly researched guide to the tanks of Hitler's formidable war machine. The Panzers that rolled over Europe were Germany's most famous fighting force and are some of the most enduring symbols of World War II. However, at the start of the war, Germany's tanks were nothing extraordinary, and it was operational encounters such as facing the Soviet T-34 during Operation Barbarossa which prompted their intensive development. Tactical innovation gave them an edge where technological development had not. Making Hitler's tanks a formidable enemy. Hitler's Tanks details the development and operational history of the light Panzer I and II developed in the 1930s, the medium tanks that were the backbone of the Panzer Divisions, the Tiger, and the formidable King Tiger, the heaviest tank to see combat in World War II. Drawing on Osprey's unique and extensive armour archive, Chris McNab skilfully weaves together the story of the fearsome tanks that transformed armoured warfare and revolutionised land warfare forever. *The Army Quarterly and Defence Journal*, 1998

Tank Aces George Forty, 1997. Forty, an ex-British Army tank officer and former director of the Bovington Tank Museum, recounts the stories of more than twenty-five tank driving aces of various nationalities. Covers conflicts from the Second World War to the Gulf War. *World War II Infantry Anti-Tank Tactics* Gordon L. Rottman, 2013-08-20. The battlefield interaction between infantry and tanks was central to combat on most fronts in World War II. The first Blitzkrieg campaigns saw the tank achieve a new dominance. New infantry tactics and weapons, some of them desperately dangerous, had to be adopted while the armies raced to develop more powerful anti-tank guns and new light weapons. By 1945, a new generation of revolutionary shoulder-fired AT weapons was in widespread use. This book explains in detail the shifting patterns of anti-tank combat, illustrated with photographs, diagrams, and colour plates showing how weapons were actually employed on the battlefield. **Churchill's Army** Stephen Bull, 2016. A fascinating and informative account of every facet of life in the UK army during the Second World War. *Swinging The Sledgehammer: The Combat Effectiveness Of German Heavy Tank Battalions In World War II* Major Christopher W. Wilbeck, 2014-08-15. This thesis is a historical analysis of the combat effectiveness of the German schwere Panzer Abteilung or Heavy Tank Battalions during World War II. During the course of World War II, the German Army developed heavy tank battalions to fulfill the concept of breaking through enemy defenses so faster, lighter mechanized forces could exploit the rupture. These heavy tank battalions had several different tables of organization but were always centered around either the Tiger or the Tiger II tank. They fought in virtually every theater of Europe against every enemy of Germany. Ultimately, the German military created eleven Army and three Waffen SS heavy tank battalions. Of the Army battalions, the German command fielded ten as independent battalions which were allocated to Army Groups as needed. The German Army assigned the last heavy tank battalion as an organic unit of the elite Panzer Grenadier Division Grossdeutschland. The Waffen SS allocated all of their battalions to a different Waffen SS Corps. Because these units were not fielded until late in 1942, they did not participate in Germany's major offensive operations that dominated the early part of World War II. Germany's strategic situation after mid-1943 forced their military onto the

defensive Consequently there are very few instances when heavy tank battalions attacked as a breakthrough force During the latter part of the war they were used in many different ways to provide defensive assistance along very wide frontages This study assesses the German heavy tank battalions as generally effective primarily because of the high kill ratio they achieved However based upon observations from a wide variety of examples this study also outlines several areas where changes may have increased their effectiveness

Armor ,1962 *Arms and Armour* Arms and Armour Society,1998 Building Guderian's Duck: Germany's Response To The Eastern Front Antitank Crisis, 1941 To 1945 L-Cmdr Scott M. Chafian,2014-08-15 The appearance of the T 34 in 1941 caused a crisis for German antitank forces Existing antitank guns were nearly impotent against the new Russian tank while anti-aircraft and artillery pieces though successful when pressed into action were insufficiently mobile to accompany mechanized forces The German Army Ordnance Office the Heereswaffenamt was responsible for development of new weapons and would be responsible for countering the threat of Russian armor The Heereswaffenamt would need to not only counter the T 34 but also do so in an environment of shifting political relationships and with an increasingly stressed industrial system Utilizing lessons from the bitterly contested battlefields of western Russia the Heereswaffenamt developed a tank destroyer the Jagdpazzer IV using the existing chassis of the Panzer IV tank and the guns of both the Panzer IV and Panther tanks The Jagdpanzer IV known by its crews as Guderian's Duck proved to be a capable tank killer against both the T 34 threat of 1941 and 1942 as well as the improved versions of 1943 and 1944
