Arms and Warfare Michael Brzoska, Frederic S. Pearson, 1994 Arms and Warfare considers the impact of arms shipments on a conflict once it has begun Using case studies the authors pinpoint the timing of arms transfers and then assess the influence of these deliveries **Arms and Warfare** Michael Brzoska, S. Pearson Frederic, 2006-07-01 While many studies have examined the relationship between arms races the causes of war this study considers the impact of arms shipments on a conflict once it has begun Looks at the effect weapon transfers have on the escalation or de escalation of warfare on the progress of negotiations Pinpoints the timing of arms transfers AT then assesses the influence of those deliveries Evaluates the leverage exercised by suppliers in deciding if when to provide arms While AT seldom exert much direct leverage over negotiations they are interpreted unfailingly as political statements by all concerned parties Although AT generally increase the bloodshed in a given conflict large scale resupply can shorten the duration of hostilities *Contributions to the Study of Peacemaking: v. Globalization, the Human Condition, and Sustainable Development in the Twenty-first Century Arno Tausch, Almas Heshmati, 2013-10-01 Globalization the Human Condition and Sustainable

Development in the Twenty first Century Cross national Perspectives and European Implications is a cross national 175 nation based exploration of the deep crisis in which Europe currently finds itself Investigating the effects of dependency theory and world systems theory upon the global success of eight dimensions of development including democracy environmental sustainability employment social cohesion high quality tertiary education and gender justice this study argues that the current European crisis has been precipitated by the pro globalist policies of the European Commission and that in the near future these policies threaten to enter Europe into a destructive race to the bottom

Understanding Non-State Actors Eran Zohar,2023-10-24 *Understanding Non State Actors* aims to reduce the scarcity of academic literature on armed non state actors NSAs that have always been a part of world politics and wars This monograph offers possibly for the first time a systematic historical review as well as a substantive theory of NSAs and their arming efforts The world has been astonished by the ability of the well armed Hamas to inflict heavy losses on the powerful Israel Thus from the Jewish rebellion against Rome to the war between the Ukrainian separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over time *Understanding Non State Actors* discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism Conflict studies War and peace studies will benefit from this study

Violent Peace David R. Mares,2001 David R Mares argues that the key factors influencing political leaders in all types of polities are the costs to their constituencies of using force and whether the leader can survive their displeasure if the costs exceed what they are willing to pay *Violent Peace* proposes a conceptual scheme for analyzing militarized conflict and supports this framework with evidence from the history of Latin America

The Arms Trade and International Criminal Law Tomas Hamilton,2025-01-22 Despite the establishment of UN embargoes the Arms Trade Treaty ATT and the EU Common Position arms export regulation suffers from significant legal and practical limitations This book critically evaluates the existing body of Arms Trade Law highlighting its inadequacies in preventing weapons from reaching perpetrators of mass violence Drawing on interviews participant observation and empirical research to assess the perspectives of judges and lawyers it also explores the International Criminal Court s narrow focus on prosecuting political and military leaders Arguing that institutional attitudes

and commitments contribute to a legal culture that obscures the potential for an arms trader case the book illustrates these dynamics through a case study of the UN Security Council's response to the Second Congo War and the ICC's investigations in the DRC Situation elucidating missed opportunities to enforce accountability against the entire spectrum of actors responsible for international crimes Through detailed examination of the arms trade's complexities *The Arms Trade and International Criminal Law* foregrounds the structural causes of atrocity and argues for broader accountability It investigates how individuals including corporate executives state officials and arms traffickers can be held directly accountable for atrocities under international law even when their actions are geographically or causally distant from the violence itself Furthermore by advancing a specific interpretation of the actus reus and mens rea elements of accomplice liability under Article 25 of the Rome Statute this book argues for a robust legal basis upon which the ICC can prosecute arms traders It therefore underscores how international criminal law can complement existing regulations by leveraging its expressive function to condemn all those who profit from atrocity
