U.S. Security, Arms Control, and Disarmament 1961-1965 United States. Department of Defense,1965 **Arms control for the 1980s** Alexander Meigs Haig,1981 **Armament, Arms Control and Artificial Intelligence** Thomas Reinhold,Niklas Schörnig,2022-10-08 Looking at a variety of armament sectors the book examines how Artificial Intelligence AI impacts the fields of armament and arms control how existing arms control measures will be affected by AI and what new approaches based on AI have been or are currently developed The significant increase in computing power the increasing reliance on software and the advent of narrow AI and deep learning algorithms all have the potential to lead to disruptive changes for military operations and warfare rendering many classical arms control instruments less effective or even useless On the other hand AI might lead to completely new arms control approaches raising the effectiveness and reliability of new verification measures To provide a common understanding the book starts by presenting a general introduction to the state of the art in artificial intelligence and arms control and how the two topics are interrelated The second part of the book looks at examples from various fields of weapon technology including weapons of mass destruction WMD conventional armament and emerging technologies The final section offers a cross cutting perspective based on the examples presented in the second part This volume will appeal to students and scholars of international relations as well as policy makers and practitioners interested in a better understanding of peace and security studies in general and armament and arms control in particular with a strong focus on AI Arms Control Without Arms Control Guy B. Roberts,2003 This is the 49th volume in the Occasional Paper series of the U S Air Force Institute for National Security Studies INSS Among the many dimensions of national security that face unprecedented changes and challenges after the end of the Cold War arms control has been as directly affected as any other dimension The formal bilateral and verification based arms control that was so central to that former period fits neither the new environment nor the expanded focus beyond the strategic nuclear arena In this paper Guy Roberts presents yet another of his insightful explanations and analyses of the adaptations and new directions that are required to give arms control continued relevance today and tomorrow This thorough analysis of the special case of biological warfare controls follows his January 2001 INSS Occasional Paper 36 This Arms Control Dog Won t Hunt The Proposed Fissile Material Cut Off Treaty at the Conference on Disarmament in chronicling both the failure of continuing emphasis on formal Cold War type arms control products and the enduring centrality of cooperative arms control processes in the current national security environment In Roberts line of argument arms control is indeed dead yet arms control can and must be reborn in the form of a wide range of integrally linked and multifaceted legal diplomatic economic and military instruments to effectively fight the spread and use of dangerous weapons and systems *Arms Control* Jozef
