Nicholas A. Sims

Arms Control A Survey And Appraisal Of Multilateral Agreements:

Arms Control Stockholm International Peace Research Institute, Jozef Goldblat, 1978 **Quarterly Review of Military Literature** ,1979 **Strategies of Arms Control** Stuart Croft, 1996 In this groundbreaking analysis Stuart Croft brings the subject of arms control into the era of complex multi polar international relations He moves beyond the narrow definitions of the phenomenon associated with the Cold War to show how it not only has a long past but also a clear future The author begins by tracing the history of agreements between polities over weapons back to ancient times An understanding of this history allows him to put forward a typology of arms control It occurs at the end of major conflicts stabilises balances between states develops norms of behaviour manages weapons proliferation and acts as a tool of international organisations Stuart Croft examines the evolution of these five qualitatively different strategies and applies the typology to arms control agreements in the post Cold War world This definitive new study will be of interest to students in international relations and security studies as well as specialists in these disciplines **Professional Journal of the United States Army** ,1979

Military Review ,1978-07 *Military Law Review* ,1981 *Nuclear Disarmament in International Law* Haralambos Athanasopoulos, 2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section

Agreements for Arms Control Jozef Goldblat, Stockholm International Peace Research Institute, 2020-11-19 Originally published in 1982 this is the most comprehensive handbook on arms control ever published It contains an analysis of the bilateral and multilateral agreements reached since World War II An assessment is made of the extent to which each agreement has affected the arms race reduced the likelihood of war or otherwise contributed to the overall goal of disarmament Ongoing arms control negotiations are also analyzed The complex problem of verification of compliance with arms control obligations is critically examined and the shortcomings of the existing arrangements are pointed out The critique is searching objective and free of the usual biases of official government reports The analysis of the arms control

agreements is preceded by an historical overview beginning with the Hague Peace Conferences held at the turn of this century through the League of Nations attempts to bring about a universal reduction of armaments to the activities of the United Nations in the field of arms regulation and general disarmament The present arms control negotiating machinery is described The texts of the relevant documents are reproduced for handy reference and the status of the implementation of the most important multilateral arms control agreements is presented in tabular form Tables and figures facilitate the reading

DA Pam ,1978 *Military Law Review Vol. 80* , [Towards the Control of Conflict](#) ,1988 **Arms Control Agreements** Jozef Goldblat,2021-01-26 This book first published in 1982 provides a well informed historical overview insightful analysis and searching critique of arms control agreements and negotiations from the Hague Declaration of 1899 to the SALT Treaties and Conventions of the 1970s and 1980s Arms control agreements of international importance and historical merit are assessed for the extent to which each affected the arms race or reduced the likelihood of war

Arms Control in Asia Gerald Segal,1987-06-18 **Army** ,1979 [China in International Society Since 1949](#) Y. Zhang,1998-10-05 This book is a reinterpretation of China s international relations since 1949 Employing the notion and theory of international society it offers a systematic examination of China s unique relationship with the society of states from its alienation in the 1950s and the 1960s to its political socialisation and economic integration in the 1980s and the 1990s It explores how such a unique relationship has shaped and is likely to shape Chinese foreign policy This book provides an entirely new perspective for our understanding of forces influencing Chinese foreign policy behaviour

The Future of Biological Disarmament Nicholas A. Sims,2009-03-04 This book examines the politics of biological disarmament focusing on the Biological Weapons Convention BWC as a treaty regime and the cornerstone of biological disarmament efforts Biological weapons have long been banned but the ban needs strengthening The 1972 Biological Weapons Convention BWC is the cornerstone of this disarmament regime After years of deadlock and disappointment its Sixth Review Conference in 2006 generated new hope that biological disarmament could be reinforced from within This book studies the intricate diplomacy of the Sixth Review Conference as a key moment in the recovery of self confidence by the treaty parties It makes detailed proposals for developing an accountability framework and stronger institutions so that the treaty regime can work better It examines alternative futures for the BWC and the trajectories to be avoided or encouraged in the short medium and longer terms as its regime evolves Controversially by comparing treaty constraints on biological chemical and nuclear weapons it restores the BWC firmly to the realm of disarmament rather than arms control and rescues it from misleading identifications with counterproliferation and counterterrorism models This book will appeal to policy makers diplomats and students of biological weapons weapons of mass destruction international security and IR in general Nicholas A Sims is Reader in International Relations at the London School of Economics He is author of four books on aspects of disarmament
