the Royal Air Force at the outbreak of the Second World War the others were the Vickers Wellington and the Handley Page
Hampden It took part in the first RAF bombing raid on German territory and remained an integral part of the early British
bomber offensive until the introduction of four engined heavies Its front line service included performing maritime
reconnaissance duties with Coastal Command while also being employed in the second line roles of glider tug trainer and
transport aircraft The aircraft was named after Whitley a suburb of Coventry where one of Armstrong Whitworth s plants was
located Scale comparison diagram of the trio of British twin engined medium bombers at the outbreak of the Second World

hopefully explain the servicing procedure while working on first line servicing of the aircraft Some jobs were more pleasant than others as you will read about not for those with a nervous disposition Hopefully the systems are explained satisfactorily Some are more complicated than others as you will no doubt appreciate when reading the text but the explanation should make everything clear The Argosy aircraft was part of the RAF Transport Command doing exactly what it says transporting people and equipment to various locations around the globe although this was usually only restricted to Europe and the Middle East I was posted to RAF Benson in January 1971 having returned from a tour of duty in Cyprus I enjoyed working on the Argosy for my last fourteen months of service I had a few continental trips as well as a four month detachment to Bahrain another enjoyable experience The stories in the book are true they are my experiences of life working on the Argosy
