Social-Ecological Systems in Transition Shoko Sakai,Chieko Umetsu,2014-08-12 This book presents an overview of current knowledge about social ecological systems SESs a productive new field dedicated to understanding the relationships between human society and nature To make the reader aware of how SESs are necessary to maintain our society the book begins with a broad perspective about what social ecological systems are and what the related research issues in this field are as well The second part discusses how human activities have changed ecosystems from temperate grasslands to tropical areas The third part focuses on the adaptability of societies to unpredictable fluctuation in ecosystems while the last part summarizes factors for the resilience of society against social and ecological shocks Human activities have severely degraded most natural ecosystems which are now in critical condition Various approaches have been developed to improve the SESs to understand environmental problems and explore better ways to increase the sustainability both of ecosystems and of human societies However a clear perspective on how to address such problems is still lacking Part of the difficulty arises because of the diversity and complexity of ecosystems and human societies Another important factor is the effect of extremely rapid changes in the social and economic characteristics of social ecological systems Consequently adaptability and resilience clearly are essential for the sustainability of SESs Although there is no one direct method to achieve high adaptability and resilience a possible way is to compare and understand the diverse problems associated with differing social ecological systems This published work makes a useful contribution to a greater understanding of the way that essential social responses linked to changes in ecosystems can potentially stimulate further research on this important and interesting subject The book will attract the attention of scholars in environmental sciences ecology and sociology and indeed of anyone interested in the concept of social ecological systems

Marketing Schools, Marketing Cities Maia Bloomfield Cucchiara,2013-04-23 Not merely institutions of learning schools have increasingly become a sign of a neighbourhood s vitality and city planners have ever more explicitly promoted good schools as a means of attracting more affluent families to urban areas a dynamic process that the author critically examines in this book Focusing on Philadelphia s Center City Schools Initiative she shows how education policy makes overt attempts to prevent or at least slow middle class flight to the suburbs By asking what happens when affluent parents become valued customers the book uncovers a problematic relationship between public institutions and private markets where the former are used to leverage the latter to effect urban transformations
