North American and European Perspectives on Sustainability in Higher Education Walter Leal Filho, Julie Newman, Amanda Lange Salvia, Laís Viera Trevisan, Laura Corazza, 2025-04-02 The scientific cultural and diplomatic relations between Europe and its partners in North America are very strong From a scientific point of view this long standing cooperation has taken place across a wide range of areas They include the field of sustainability where North America and Europe are working hand in hand seeking solutions to the many regional and global problems currently faced Against this backdrop and in order to facilitate a broad discussion on the contribution of higher education institutions from both sides of the Atlantic towards a more sustainable future this book is being produced The book gathers inputs from universities and research organizations on the one hand but also from companies and enterprises on the other from Europe and North America working on matters related to sustainable development in a higher education context It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking Furthermore the book intends to provide a fertile basis upon which European and North American organizations may cooperate more closely in this key area Last but not least a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aim to show how sustainability in North America and in Europe may be enhanced in practice

La ciudad y el medio natural José Fariña Tojo, 2001-02-26 Ante este nuevo siglo se plantea la conveniencia de que en los procesos de urbanización regidos por el planteamiento no sólo se consideren variables económicas sociales o artísticas sino también y de forma preferente las cuestiones relativas al Medio Ambiente Se ha hecho acuciante la necesidad de que planificadores arquitectos y urbanistas pongan en un lugar destacado dentro de sus prioridades la consideración por la Naturaleza Con este libro se pretende ayudar a la formación de los profesionales encargados de llevar a cabo el proceso de construcción de la ciudad introduciendo los temas ambientales aplicados a sus intereses específicos

1989 2nd European Conference on Architecture T.C. Steemers, Wolfgang Palz, 1990-04-30 Proceedings of an International Conference held at Paris France December 4 8 1989

Climatología urbana María del Carmen Moreno García, 1999-10-26 El conocimiento y evaluación de los cambios a escala microclimática singularmente los que se producen en las ciudades son de vital importancia En el texto se recogen las principales modificaciones que sufren los distintos elementos climáticos temperatura humedad precipitación y viento por causa de la urbanización fijando la atención especialmente en uno de los fenómenos más característicos del clima urbano como son las islas de calor También se señalan las diferentes metodologías y técnicas para el estudio del clima urbano así como la utilidad y aplicaciones del mismo El texto se acompaña de una serie de ejercicios prácticos y abundante información bibliográfica y direcciones de interés en internet

El cambio climático y el sector energético Diego Fernando Otero Prada, 2023-06-16 Este libro presenta una discusión sobre temas que tienen que ver con el cambio climático y el sector energético centrado en Colombia y además se introducen

discusiones sobre los modelos de desarrollo y la ecología El principal mensaje es que no se puede confundir a Colombia con el resto del mundo por las especificidades del país a diferencia de los países desarrollados El principal argumento es que en Colombia el sector eléctrico emite pocos gases de efecto invernadero un 4.5% del total mientras que el sector agropecuario y el uso del suelo explican 45% en especial la deforestación con un 20% De ahí que los esfuerzos deben dedicarse a los sectores donde se causan más emisiones de gases de efecto invernadero Se critica el énfasis en el sector eléctrico cuando aquí no es el problema ya que la generación de energía eléctrica es 70% producida por hidroeléctricas por lo cual centrarse en energía solar y eólica es exagerado Se argumenta que el país debe tener una política industrial basada en el sector energético para que no se siga dependiendo tecnológicamente del exterior cuando podrá pensarse en tener fábricas de paneles solares y aerogeneradores Enfatiza que hay que usar el potencial hidroeléctrico de Colombia que es enorme Se analiza el consumo de energía por sectores mostrando que se exagera también el efecto del sector transporte en las emisiones que explica el 15% de las mismas cuando en los países desarrollados es más del 30% y que la electrificación del transporte es un objetivo de décadas Define que hay que eliminar el consumo de combustible y de carbón en forma inteligente y sin causar desequilibrios económicos jurídicos y sociales Finaliza con un análisis de la compra de ISA empresa de transmisión de energía a eléctrica de alto voltaje por Ecopetrol y desenmascara todos los argumentos equivocados que se dieron para justificar esta compra

Earthen Architecture: Past, Present and Future C. Mileto, F. Vegas, L. García Soriano, V. Cristini, 2014-09-01 Earthen architecture is widespread all over the world and demonstrates a significant richness of varieties both in application and in materials used This book discusses and debates the lessons that can be learned from earthen architecture to create sustainable architecture today both for the conservation of traditional existing buildings and the
