The Region of the Upper Msta River in the Early Middle Ages Inna Islanova, 2021-02-01 This is a book about the archaeological sites of the 5th to 8th century of the Volga Baltic watershed in the forest zone of Eastern Europe The region has long been known for burial assemblages of the so called culture of the Pskov long barrows but the book brings to light a different group of sites The population living on those sites co existed with those who buried their dead under the Pskov long barrows but within a different landscape This polarity suggests that the local population was behind the culture of Pskov long barrows while the new category of site point to immigrants from the southwest The book suggests that the new archaeological sites were inhabited by a Slavic speaking population from the periphery of the Kiev and Kolochin cultures

The Long Sixth Century in Eastern Europe Florin Curta, 2021-05-12 In *The Long Sixth Century in Eastern Europe* Florin Curta offers a social and economic history of East Central South Eastern and Eastern Europe during the 6th and 7th centuries It challenges the current model of transition from Antiquity to the early Middle Ages on the basis of an interpretation of the written sources but especially of an enormous amount of archaeological evidence accumulated in the last 50 years or so It deals with societies in close contact with the Roman world as well with those located very far from it It addresses questions of property subsistence crafts trade and social change

Anthropology & Archeology of Eurasia, 2008 **Women Archaeologists under Communism, 1917-1989** Florin Curta, Iurie Stamati, 2021-11-27 This book explores the uncharted territory of the history of archaeology under Communism through the biographies of five women archaeologists from the Soviet Union Bulgaria Romania Hungary and Poland They were working in medieval archaeology with a specific focus on the early Slavs The choice of specialists in medieval archaeology has much to do with the fact that in the five East European countries considered in this book medieval archaeology began to develop into a serious discipline less than a century ago The main catalyst for the sudden rise of medieval archaeology was a dramatic shift in emphasis from traditional political and constitutional to social and economic history In five countries the rise of medieval archaeology thus coincides in time and was ultimately caused by the imposition of Communist regimes The five women were therefore true pioneers in their field and respective countries

Archaeology of the Russian Far East Sarah M. Nelson, 2006 Arranged in chronological order and by region each of these studies is written by a specialist who has participated in some or all of the archaeological expeditions reported here *History of Music in Russia from Antiquity to 1800, Volume 1* Nikolai Findeizen, 2008-02-07 In its scope and command of primary sources and its generosity of scholarly inquiry Nikolai Findeizen's monumental work published in 1928 and 1929 in Soviet Russia places the origins and development of music in Russia within the context of Russia's cultural and social history Volume 2 of Findeizen's landmark study surveys music in court life during the reigns of Elizabeth I and Catherine II music in Russian domestic and public life in the second half of the 18th century and the variety and vitality of Russian music at the end of the 18th century

Slavs in the Making Florin Curta, 2020-09-28 *Slavs in the Making* takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started It is precisely in this area that sociolinguistics can offer a serious alternative to the language tree model currently favoured in linguistic paleontology The question of how best to explain the spread of Slavic remains a controversial issue This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility It will appeal to scholars and students interested in medieval history migration and the history of Eastern and Central Europe
