Patent Office, 1916 **Prehistoric Crete** Joanne M. Murphy, 2011-06-15 Since the inception of Minoan archaeology studies pertaining to tombs and tomb deposits have played seminal roles in our understanding of Minoan culture and the reconstruction of Bronze Age society For several geographical areas and chronological periods of Cretan history tombs are the most abundant source of data Each author in this volume takes a clear and distinct approach to the data including some that emphasize political geography on multi regional and multi scalar levels some that examine the commemoration of the dead and of the community for legitimizing purposes but also for maintaining and or creating elite positions in social systems and others that underline the overlap between mortuary rituals and religion The aim of this volume is not to present all tombs in all periods on Crete comprehensively but the breadth of these papers is intended generate a discourse not just among archaeologists working in different areas and time periods on Crete but also among archaeologists in Greece and a broader anthropological audience *Specifications and Drawings of Patents Issued from the United States Patent Office* United States. Patent Office, 1912 **The Roman Fort of Vindolanda** P T Bidwell, 2014-06-15 This work is principally an account of excavations carried out at Vindolanda in 1980 but also reviews the available evidence for the history of the fort and vicus Early timber forts were succeeded by a stone fort in the Hadrianic period perhaps in c 122 4 Reconstruction of some interior buildings were erected in the northern part of the praetentura they are thought to have been houses accommodating a civilian work force under military control West of the fort lay a number of buildings apparently serving as a military annexe rather than civilian vicus The fort was almost entirely rebuilt in c 223 5 retaining only parts of the original west and east walls After a delay of about a decade when part of the garrison was probably posted elsewhere a double barrack block was erected in the north east corner of the fort possibly to accommodate cavalry The building underwent a number of alterations and remained in use until c 400 There are slight indications of activity on the site subsequent to that date Rebuilding of the fort in c 223 5 was accompanied by construction of an extensive vicus which was largely abandoned by the last quarter of the third century Foremost amongst the finds was a fragment of a military diploma issued to a soldier of cohors Tungrorum There were numerous objects of iron and copper alloy A considerable quantity of pottery was recovered from a sequence of third and fourth century deposits Coin finds from the fort
