Armchair Economist Economics And Everyday Experience:

The Armchair Economist Steven E. Landsburg, 2012-05-10 Air bags cause accidents because well protected drivers take more risks This well documented truth comes as a surprise to most people but not to economists who have learned to take seriously the proposition that people respond to incentives In *The Armchair Economist* Steven E Landsburg shows how the laws of economics reveal themselves in everyday experience and illuminate the entire range of human behavior Why does popcorn cost so much at the cinema The obvious answer is that the owner has a monopoly but if that were the whole story there would also be a monopoly price to use the toilet When a sudden frost destroys much of the Florida orange crop and prices skyrocket journalists point to the obvious exercise of monopoly power Economists see just the opposite If growers had monopoly power they d have raised prices before the frost Why don t concert promoters raise ticket prices even when they are sure they will sell out months in advance Why are some goods sold at auction and others at pre announced prices Why do boxes at the football sell out before the standard seats do Why are bank buildings fancier than supermarkets Why do corporations confer huge pensions on failed executives Why don t firms require workers to buy their jobs Landsburg explains why the obvious answers are wrong reveals better answers and illuminates the fundamental laws of human behavior along the way This is a book of surprises a guided tour of the familiar filtered through a decidedly unfamiliar lens This is economics for the sheer intellectual joy of it

Armchair Mist Steven E. Landsburg, 1995-03-01 Landsburg economics Univ of Rochester demonstrates the economist s way of thinking about everyday occurrences The result is a compilation of questions ranging from why popcorn costs so much at movie theaters and why rock concerts sell out to why laws against polygamy are detrimental to women Many of the issues raised are controversial and even somewhat humorous but they are clearly explained only from an economic perspective as opposed to other dynamics of human behavior There are also clear explanations of the misconceptions about unemployment rates measures of inflation and interest rates The book is not a textbook but shows how one economist solves puzzling questions that occur in daily living

Markets and Measurements in Nineteenth-Century Britain Aashish Velkar, 2012-06-25

Measurements are a central institutional component of markets and economic exchange By the nineteenth century the measurement system in Britain was desperately in need of revision a multiplicity of measurement standards proliferation of local or regional weights and measures and a confusing array of measurement practices made everyday measurements unreliable Aashish Velkar uncovers how metrology and economic logic alone failed to make measurements reliable and discusses the importance of localised practices in shaping trust in them Markets and Measurements in Nineteenth Century Britain steers away from the traditional explanations of measurement reliability based on the standardisation and centralisation of metrology the focus is on changing measurement practices in local economic contexts Detailed case studies from the industrial revolution suggest that such practices were path dependent and anthropocentric Therefore whilst standardised metrology may have improved precision it was localised practices that determined the reliability and trustworthiness of measurements in economic contexts
