Thies, 2003 Viewing the behavior of NATO members through the prism of bargaining theory reveals them as states intent on obtaining the benefits of membership at the least cost to themselves This book shows how NATO members use a variety of strategies and tactics to try to get the better of each other without wrecking an alliance that realizes their shared goals and from which they all benefit The book examines the original design of the alliance patterns of bargaining during the Cold War and post Cold War periods how their rivalries impact members domestic policies of defense and welfare and what this history suggests about NATO s future prospects Recent interventions in the Balkans and the Middle East make this virtually a playbook for following current events *Special Bibliography Series* ,1957 *Rethinking National Security* Frances Scott, 1990 *Special Bibliography Series* United States Air Force Academy. Test Policy in Defense Bernard R. Gifford, Linda C. Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective future Test scores may determine a child's admission to kindergarten and promotion to the first grade Most states award the high school diploma only if a student has passed a minimum competency test Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests In the labor market as a condition of employment or assignment to training programs more and more employers are requiring workers to sit for personnel selection tests Additionally it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy In short with increasing frequency and intensity scores on examinations that purport to be objective and precise measures of individual knowledge abilities and potential are playing a critical role in the opportunity marketplace Similarly test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each In all these instantiations test scores are at the center of high stakes decision making about the future of individuals and of the nation itself

War, Peace and the Military Franz Kernic, 2023-03-17 This book is a comprehensive analysis of the various social science approaches to explaining and interpreting war peace and the military Its central aim is to trace and reconstruct those basic assumptions constructed and thought processes undertaken by modern social sciences in their

research and conceptualization of military violence and the use of force In addition to such reconstruction the aim is also to enquire into the preconditions of such thought This study therefore eschews the development of an explicit strategy in the sense of a research strategy but instead is much more concerned with thinking about its subject matter by means of rethinking and reflecting upon different theoretical approaches and problems The investigation includes a critical reexamination of the tradition of military sociological research from the beginning of modern sociology to late twentieth century theoretical approaches regarding the security focused and or war driven aspects of modern society **Defence and Consensus** Christoph Bertram,1983-06-18 **Studies in International Security** ,1982
