The scientific debates on border crossings and cultural exchange between Judaism Christianity and Islam have much increased over the last decades Within this context however little attention has been given to the biblical Exodus which not only plays a pivotal role in the Abrahamic religions but also is a master narrative of a border crossing in itself Sea and desert are spaces of liminality and transit in more than just a geographical sense Their passage includes a transition to freedom and initiation into a new divine community an encounter with God and an entry into the Age of law The volume gathers twelve articles written by leading specialists in Jewish and Islamic Studies Theology and Literature Art and Film history dedicated to the transitional aspects within the Exodus narrative Bringing these studies together the volume takes a double approach one that is both comparative and intercultural How do Jewish Christian and Islamic texts and images read and retell the various border crossings in the Exodus story and on what levels do they interrelate By raising these questions the volume aims to contribute to a deeper understanding of contact points between the various traditions *Conservation of Books* Abigail Bainbridge,2023-03-27

Conservation of Books is the highly anticipated reference work on global book structures and their conservation offering the first modern comprehensive overview on this subject The volume takes an international approach to its subject Written by over 70 specialists in conservation and conservation science based in 19 countries its 26 chapters cover traditional book structures from around the world the materials from which they are made and how they degrade and how to preserve and conserve them It also examines the theoretical underpinnings of conservation what and how to treat and the ethical cultural and economic implications of treatment Technical drawings and photographs illustrate the structures and treatments examined throughout the book Ultimately readers gain an in depth understanding of the materiality of books in numerous global contexts and reflect on the practical considerations involved in their analysis and treatment *Conservation of Books* is a quintessential reference work for book conservators and anyone working with books such as collection managers librarians curators dealers collectors historians and related professionals It is also an indispensable text for students to complement hands on training in this field
