Armored Ships The Ships Their Settings And The Ascendancy That They Sustained For 80 Years:

Empire, Technology and Seapower Howard J. Fuller, 2014-01-03 This book examines British naval diplomacy from the end of the Crimean War to the American Civil War showing how the mid Victorian Royal Navy suffered serious challenges during the period Many recent works have attempted to depict the mid Victorian Royal Navy as all powerful innovative and even self assured In contrast this work argues that it suffered serious challenges in the form of expanding imperial commitments national security concerns precarious diplomatic relations with European Powers and the United States and technological advancements associated with the armoured warship at the height of the so called Pax Britannica Utilising a wealth of international archival sources this volume explores the introduction of the monitor form of ironclad during the American Civil War which deliberately forfeited long range power projection for local coastal command of the sea It looks at the ways in which the Royal Navy responded to this new technology and uses a wealth of international primary and secondary sources to ascertain how decision making at Whitehall affected that at Westminster The result is a better balanced understanding of Palmerstonian diplomacy from the end of the Crimean War to the American Civil War the early evolution of the modern capital ship including the catastrophic loss of the experimental sail and turret ironclad H M S Captain naval power projection and the nature of empire technology and seapower This book will be of great interest to all students of the Royal Navy and of maritime and strategic studies in general **Victory at Sea** Paul Kennedy, 2022-04-26 A sweeping lavishly illustrated one volume history of the rise of American naval power during World War II A brilliant and gripping book by a master historian working at the top of his powers Fredrik Logevall Harvard University Paul Kennedy has written a classic in this sweeping narrative account of the desperate struggle to command the seas and America s rise as a superpower during the Second World War John H Maurer U S Naval War College In this engaging narrative brought to life by marine artist Ian Marshall s beautiful full color paintings historian Paul Kennedy grapples with the rise and fall of the Great Powers during World War II Tracking the movements of the six major navies of the Second World War the allied navies of Britain France and the United States and the Axis navies of Germany Italy and Japan Kennedy tells a story of naval battles maritime campaigns convoys amphibious landings and strikes from the sea From the elimination of the Italian German and Japanese fleets and almost all of the French fleet to the end of the era of the big gunned surface vessel the advent of the atomic bomb and the rise of an American economic and military power larger than anything the world had ever seen Kennedy shows how the strategic landscape for naval affairs was completely altered between 1936 and 1946 **Armored Ships** Ian H. Marshall, 1990 An illustrated history of the armored ship which considers the captains and crews of the vessels and gives accounts of the battles they fought **The Mariner's Mirror** Leonard George Carr Laughton, Roger Charles Anderson, William Gordon Perrin, 1991 **Naval History** , 1992 **Clad in Iron** Howard J. Fuller, 2007-12-30 This work addresses many persistent misconceptions of what the monitors were for and why they failed in other roles associated with

naval operations of the Civil War such as the repulse at Charleston April 7 1863 Monitors were ironclads not fort killers Their ultimate success is to be measured not in terms of spearheading attacks on fortified Southern ports but in the quieter much more profound strategic deterrence of Lord Palmerston's ministry in London and the British Royal Navy's potential intervention The relatively unknown Cold War of the American Civil War was a nevertheless crucial aspect of the survival or not of the United States in the mid 19th century Foreign intervention explicitly in the form of British naval power represented a far more serious threat to the success of the Union blockade the safety of Yankee merchant shipping worldwide and Union combined operations against the South than the Confederate States Navy Whether or not the North or South would be clad in iron thus depended on the ability of superior Union ironclads to deter the majority of mid Victorian British leaders otherwise tempted by their desire to see the American experiment in democratic class structures and popular government finally fail Discussions of open European involvement in the Civil War were pointless as long as the coastline of the United States was virtually impregnable Combining extensive archival research on both sides of the Atlantic this work offers an in depth look at how the Union Navy achieved its greatest grand strategic victory in the American Civil War Through a combination of high tech machines armed with monster guns intensive coastal fortifications and a new fleet of high speed Union commerce raiders the North was able to turn the humiliation of the Trent Affair of late 1861 into a sobering challenge to British naval power and imperial defense worldwide
