Arms Dynamic In World Politics:

The Arms Dynamic in World Politics Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR

SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation The Handbook on the Political Economy of War Christopher J. Coyne, Rachel L. Mathers, 2011-01-01 The Handbook on the Political Economy of War highlights and explores important research questions and discusses the core elements of the political economy of war Strategy in the Contemporary World John Baylis, 2007 Provides a coverage of issues of war and peace such as terrorism irregular warfare and weapons of mass destruction This work contains a set of reflections on the role of military power in the contemporary world It analyzes conflicts from Afghanistan to the Iraq War and looks at the debates about the lessons that can be learned from these wars **Militarism and International Relations** Anna Stavrianakis, Jan Selby, 2013 Militarism and international relations in the 21st century Twenty first century militarism a historical sociological framework Martin Shaw Challenging cartographies of enmity empire war and culture in contemporary militarization Simon Dalby Militarism new wars and the political economy of development a Gramscian critique Nicola Short War becomes academic human terrain virtuous war and contemporary militarism an interview with James der Derian Anna Stavrianakis and Jan Selby From Oslo to Gaza Israel s enlightened public and the remilitarization of the Israeli Palestinian conflict Yoav Peled From political armies to the war against crime the transformation of militarism in Latin America Dirk Kruijt and Kees Koonings The global arms trade and the diffusion of militarism David Kinsella Wilsonians under arms Andrew J Bacevich The political economy of EU space policy militarization the case of the global monitoring for environment and security Iraklis Oikonomou Producing men the nation and commodities the cultural political economy of militarism in Egypt Ramy M K Aly The Chinese military its political and economic function Kerry Brown and Claudia Zanardi **The Realism Reader** Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism s engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism s engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international

relations theory with a particular focus on realism The Logic of American Nuclear Strategy Matthew Kroenig, 2018 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability In The Logic of American Nuclear Strategy Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state's national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative evidence The Logic of American Nuclear Strategy will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence **Preventing the Use of Weapons of Mass Destruction** Eric Herring, 2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist *Military Industry and Regional Defense Policy* Timothy D. Hoyt, 2017-07-05 *Military Industry and Regional Defense Policy* re-examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective **The Globalization of Political Violence** Richard Devetak, Christopher W. Hughes, 2007-12-18 This edited volume offers important new methodological and multi disciplinary

insights into the study of globalization and political violence **Theory of Strategy** Colin S. Gray, 2014 Strategy and Defence Planning Meeting the Challenge of Uncertainty explores and examines why and how security communities prepare purposefully for their future defence Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning *Contemporary Security Studies* Alan Collins, 2022 With unrivalled coverage of a wide range of issues from terrorism nuclear deterrence and the weapons trade to environmental security transnational crime and cyber security Contemporary Security Studies is the definitive cutting edge introduction to security studies Bringing together contributions from leading scholars it provides a student friendly guide to traditional and critical theoretical approaches as well as the most important contemporary issues that dominate the modern security field Whether you are exploring how politicians portrayed the Covid19 pandemic as a security issue or the role that popular culture plays in promoting peace a broad variety of real world case studies and examples throughout the text encourage you to question your preconceptions of security studies and to critically evaluate key approaches and ideas in the subject New to this Edition A new Chapter 13 on

The Second Nuclear Age Colin S. Gray,1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious

Making Global Society Barry Buzan,2023-08-10 Barry Buzan proposes a new approach to making International Relations a truly global discipline that transcends both Eurocentrism and comparative civilisations He narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved Deploying the English School s idea of primary institutions and setting their story across three domains interpolity transnational and interhuman this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories Buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition This device enables a radical retelling of how modernity emerged from the late 18th century He shows how the concept of global society can build bridges connecting International Relations Global Historical Sociology and Global World History
