Around Africa And Asia By Sea:

Around Africa and Asia by Sea Irene M. Franck, David M. Brownstone, 1999-06-01 The Spice Route was the first true link between East and West. At the height of its use it linked the great civilizations of the Mediterranean, India and Southeast Asia. The Spice Route is believed to have originated some 5 000 years ago and parts of the route are traveled today. To follow its development is to observe the power struggle of countless empires for its control and to learn how Western and Eastern cultures adapted to each other through economic partnership. The Cape of Good Hope Route around Africa played an equally critical role in East-West trade. 50 maps and illustrations. Around Africa and Asia by Sea Irene M. Franck, David M.

Brownstone, 1990 A historical survey of the Spice Route and the Cape of Good Hope Route used to go around Africa and to reach Asia by sea. **Regional Security in the Asia Pacific** Marika Vicziany, David P. Wright-Neville, Peter Lentini, 2004-03-25

The September 2001 terrorist attacks shocked the world. But what did they change? In this book Asia specialists from academe and policy think tanks assess the impact of 9/11 on the Asia Pacific. Drawing on unique fieldwork access to a wide range of documents and inside expertise the authors consider how old geo-strategic and cultural fault lines have been overlaid with new security threats from state and non-state actors. With chapters on specific countries and regions, defense policies, terrorism and current and potential conflict zones this collection critically examines the Asia Pacific region's post-9/11 as well as post-Iraq war security architecture. **Decoding the Chessboard of Asian Geopolitics** Debasish

Through its exploration of the patchwork of distinctive subregions of each continent, the book analyses how well the BRI accommodates sub-regional variation as it attempts to integrate Asia

Africa and Europe under Chinese auspices Individual chapters focus on how developing subregions experience BRI relations with China while others focus on how liberal powers seek to compete with China's BRI agenda The contributions also gauge the impact of the COVID 19 pandemic on the BRI in regional settings and point to its future implications Offering a panoramic view of the vast mosaic of Asian African and European sub regions targeted by the BRI this book will be of interest to scholars and students of International Relations and Global Political Economy as well as Chinese politics and those with an interest in the Belt and Road Initiative more broadly
