Military Review, 2010 **Professional Journal of the United States Army**, 2010 *Review of Current Military Literature*, 2010 **Art and the Nazis, 1933-1945** Arthur J. McLaughlin, Jr., 2022-01-13. This first comprehensive analysis of the Third Reich's efforts to confiscate, loot, censor, and influence art begins with a brief history of the looting of artworks in Western history. The artistic backgrounds of Adolf Hitler and Hermann Goering are examined along with the various Nazi art looting organizations and Nazi endeavors to both censor and manipulate the arts for propaganda purposes. Long-held beliefs about the Nazi destruction of degenerate art are examined drawing on recently developed university databases, new translations of original documents, and recently discovered information. Theft and destruction of artworks by the Allies and looting by Soviet trophy brigades are also documented.

Security, Technology and Global Politics Mark Lacy, 2014-02-05. This book analyses some of the key problems explored in Paul Virilio's theorising on war and security. Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society, economy, and politics. His examination of the connections between geopolitics, war, speed, technology, and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty-first century. Interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer, faster, networked, and more efficient. *Security, Technology and Global Politics* examines some of the key concepts and concerns in Virilio's writings on security, society, and technology: endo-colonization, fear, and the war on terror; cities and panic; cinema and war; ecological security and integral accidents; universities and ideas of progress. Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics, but this book challenges this apocalyptic reading of Virilio's work, suggesting that while he doesn't provide us with easy solutions to the problems we face, the political force in Virilio's work comes from the questions he leaves us with about speed, security, and global politics in times of crisis, terror, and fear. This book will be of interest to students of critical security studies, political

theory sociology political geography cultural studies and IR in general
