Ars Nova And The Renaissance 1300 1540:

Ars Nova and the Renaissance, 1300-1540 Anselm Hughes, Gerald Abraham, 1960 This book is an entirely new work and replaces the Oxford History of Music which first appeared over fifty years ago It has been planned as a complete survey of music from the earliest times down to the present day including not only the achievements of the Western world but also the contributions made by Eastern civilizations and primitive societies The subject matter in Volume Three stretches from the introduction of the Ars Nova at the beginning of the fourteenth century to the full flood of renaissance music in the mid sixteenth century For the first time there emerge named composers with an undisputed corpus of surviving works Machaut Landini Dunstable Dufay Ockeghem Josquin and many others of lesser fame Polyphony grows steadily more mature and organic and keyboard music begins to appear in recognizably distinct forms Many of the works composed during this period are still regularly performed and apart from its value to specialists the volume should provide interesting and illuminating reading for all who take pleasure in the music of an age remarkable not only for promise but also for achievement

Moll, 2014-04-08 During the 1950s and 1960s Austro German scholars made decisive advances in developing concepts to account for harmonic processes in late medieval music Despite the considerable potential these ideas hold for analysis and criticism of early music they have hitherto exerted little influence outside their countries of origin In order to render this valuable literature more immediately accessible to English speaking students and scholars this book presents translations of twelve seminal articles that originally appeared during the years 1948 1967 along with a comprehensive introductory chapter detailing the evolution of competing theories and terminology

The New Oxford History of Music, 1974 [Early English Composers and the Credo](#) Wendy J Porter, 2022-03-23 This book develops an innovative approach for understanding the relationship between music and words in the works of five major composers of the English Renaissance John Taverner Christopher Tye John Sheppard Thomas Tallis and William Byrd Focusing on these

composers settings of the Latin Credo the author shows how musical and linguistic emphasis can be used to understand the composers theological interpretations of the text By combining markedness theory with style analysis this study demonstrates that the composers used their musical skills to not only create beautiful music but also raise certain elements of the text to the foreground of perception and relegate others to supporting roles inviting listeners to experience the familiar words of the liturgy in unique ways Providing new insights into the changing musical and religious world of the sixteenth century this book is relevant to anyone researching music or religion in early modern England while offering a flexible and widely adaptable tool for the analysis of musical textual relationships
