Clingerman,2018-07-03 Humans have been described as meaning making animals At the threshold of the Anthropocene how might humans artistically envision their place in the world Do humans possess cultural tools which will allow us to imagine new possibilities and relationships with the natural environment at a time when our material surroundings are under siege Exploring Nature s Texture looks at the imaginative possibilities of using the visual arts to address the breakdown of the human relationship with the environment Bringing together contributions from artists theologians anthropologists and philosophers it investigates the arts as a bridge between culture and nature as well as between the human and more than human world Contributors Whitney A Bauman Sigurd Bergmann Forrest Clingerman Timothy M Collins J Sage Elwell Reiko Goto Arto Haapala Tim Ingold Karolina Sobecka George Steinmann *Aesthetics and the Environment* Allen Carlson,2000 This books presents fresh and fascinating insights into our interpretation of the environment and shows how our aesthetic experience encompasses nature rather than art Armed Conflicts and the Environment Anne Dienelt,2022-08-12 The book rethinks the means of harmonization of prima facie norm conflicts in light of the multitude of international agreements across regimes The methodology deployed in this book which is referred to as complementation or complementary application represents a novel approach by focusing on commonly shared objectives and a unifying ordre public transnational across fields of public international law that allow for a harmonization beyond traditional treaty interpretation Fields of public international law mainly the laws of armed conflict international environmental law and human rights law apply simultaneously to questions regarding the environment and war Such a coexistence challenges the unity of the international legal order and it also challenges the means of harmonization across fields of public international law However eventually the co existence of several fields of public international law can result in a refinement of international law and enhanced legal protection Diversification can also contribute to clarification or normative intensification in areas of parallel application of various fields and multilayered legal protection demonstrating a counter option to fragmentation **Drawing and Painting the Natural Environment** Barclay Sheaks,1974-01-01 Instructions and advice encourage the artist in drawing and painting landscapes and seascapes **Nature and Landscape** Allen Carlson,2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field s historical background and then surveys contemporary positions on the aesthetics of nature such as scientific

cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment
