Capital of the World Pauline Adema, 2010-02-17 According to Pauline Adema you smell Gilroy California before you see it In *Garlic Capital of the World* the folklorist and culinary anthropologist examines the role of food and festivals in creating a place brand or marketable identity The author scrutinizes how Gilroy California successfully transformed a negative association with the pungent bulb into a highly successful tourism and marketing campaign This book explores how local initiatives led to an iconization of the humble product in Gilroy The city a well established agricultural center and bedroom community south of San Francisco rapidly built a place brand identity based on its now famous moniker Garlic Capital of the World To understand Gilroy's success in transforming a local crop into a tourist draw Adema contrasts the development of this now thriving festival with events surrounding the launch and demise of the PigFest in Coppell Texas Indeed the Garlic Festival is so successful that the event is all that many people know about Gilroy Adema explores the creation and subsequent selling of foodscapes or food themed place identities This seemingly ubiquitous practice is readily visible across the country at festivals celebrating edibles like tomatoes peaches spinach and even cauliflower Food Adema contends is an attractive focus for image makers charged with community building and place differentiation Not only is it good to eat food can be a palatable and marketable symbol for a town or region

Cultures in Movement Martine Raibaud, Ionut Untea, Micéala Symington, 2015-02-05 The contributors to this volume encourage a re thinking of the very notion of culture by examining the experiences situations and the representations of those who chose or were forced to change cultures from the nineteenth century to the present day Beyond a simple study of migration forced or otherwise this collective work also re examines the model of integration As recent entrants into new social settings may be perceived as affecting the previously accepted social equilibrium mechanisms encouraging or inhibiting population flows are sometimes put in place From this perspective integration may become less a matter of internal choice than an external obligation imposed by the dominant political power in which case integration may only be a euphemism for cultural uniformity The strategies of cultural survival developed as a reaction to such a rising tide of cultural uniformity can be seen as necessary points of departure for an ever growing shared multiculturalism A long term voluntary commitment to make cultural boundaries more flexible and allow a more engaged individual participation in the process of defining the self and finding its place within a culture in movement may represent a key element for cultural cohesion in a globalized world

Trubek,2000-12-04 Paris is the culinary centre of the world All the great missionaries of good cookery have gone forth from it and its cuisine was is and ever will be the supreme expression of one of the greatest arts of the world observed the English author of *The Gourmet Guide to Europe* in 1903 Even today a sophisticated meal expertly prepared and elegantly served must almost by definition be French For a century and a half fine dining the world over has meant French dishes and above all French chefs Despite the growing popularity in the past decade of regional American and international cuisines French terms like julienne saute and chef de cuisine appear on restaurant menus from New Orleans to London to Tokyo and culinary schools still consider the French methods essential for each new generation of chefs Amy Trubek trained as a professional chef at the Cordon Bleu explores the fascinating story of how the traditions of France came to dominate the culinary world One of the first reference works for chefs *Ouverture de Cuisine* written by Lancelot de Casteau and published in 1604 set out rules for the preparation and presentation of food for the nobility Beginning with this guide and the cookbooks that followed French chefs of the seventeenth and eighteenth centuries codified the cuisine of the French aristocracy After the French Revolution the chefs of France found it necessary to move from the homes of the nobility to the public sphere where they were able to build on this foundation of an aesthetic of cooking to make cuisine not only a respected profession but also to make it a French profession French cooks transformed themselves from household servants to masters of the art of fine dining making the cuisine of the French aristocracy the international haute cuisine Eager to prove their good taste the new elites of the Industrial Age and the bourgeoisie competed to hire French chefs in their homes and to entertain at restaurants where French chefs presided over the kitchen *Haute Cuisine* profiles the great chefs of the nineteenth century including Antonin Careme and Auguste Escoffier and their role in creating a professional class of chefs trained in French principles and techniques as well as their contemporary heirs notably Pierre Franey and Julia Child The French influence on the world of cuisine and culture is a story of food as status symbol Tell me what you eat the great gastronome Brillat Savarin wrote and I will tell you who you are *Haute Cuisine* shows us how our tastes desires and history come together at a common table of appreciation for the French empire of food Bon appetit **Consuming Painting** Allison Deutsch,2021-02-01 In *Consuming Painting* Allison Deutsch challenges the pervasive view that Impressionism was above all about visual experience Focusing on the language of food and consumption as they were used by such prominent critics as Baudelaire and Zola she writes new histories for familiar works by Manet Monet Caillebotte and Pissarro and creates fresh possibilities for experiencing and interpreting them Examining the culinary metaphors that the most influential critics used to express their attraction or

disgust toward painting Deutsch rethinks French modern life painting in relation to the visceral reactions that these works evoked in their earliest publics Writers posed viewing as analogous to ingestion and used comparisons to food to describe the appearance of paint and the painter's process The food metaphors they chose were aligned with specific female types such as red meat for sexualized female flesh confections for fashionably made up women and hearty vegetables for agricultural laborers These culinary figures of speech Deutsch argues provide important insights into both the fabrication of the feminine and the construction of masculinity in nineteenth century France Consuming Painting exposes the social politics at stake in the deeply gendered metaphors of sense and sensation Original and convincing Consuming Painting upends traditional narratives of the sensory reception of modern painting This trailblazing book is essential reading for specialists in nineteenth century art and criticism gender studies and modernism
