Arms Industry Limited Herbert Wulf, 1993 Arms Industry Limited is an empirical account of the size and structure of the world arms industry with special case studies of the United States the former Soviet Union Canada countries in both Western and Central Europe and countries in the less developed world and in the Asia Pacific region The book describes the various strategies which arms producing companies have adopted in order to meet the challenges and commitments of the post cold war world Governments are in the process of restructuring national armed forces and revising military equipment procurement plans Military budgets are tighter in many parts of the world affecting national arms production and arms exports The most common company strategies are to reduce the size of the firm and lay off employees to mothball production facilities to transnationalize firms and to convert firms to non military production While there are counter pressures to a decrease in the production and export of arms in the future companies will probably have to reduce their production capacities and number of employees even further The strong international pressure on governments to regulate arms exports particularly since the 1991 Persian Gulf War is also examined by the international group of experts who have contributed the case studies in the volume

Arms and Innovation James Hasik,2008-09-15 With many of the most important new military systems of the past decade produced by small firms that won competitive government contracts defense industry consultant James Hasik argues in Arms and Innovation that small firms have a number of advantages relative to their bigger competitors Such firms are marked by an entrepreneurial spirit and fewer bureaucratic obstacles and thus can both be more responsive to changes in the environment and more strategic in their planning This is demonstrated Hasik shows by such innovation in military technologies as those that protect troops from roadside bombs in Iraq and the Predator drones that fly over active war zones and that are crucial to our new war on terror For all their advantages small firms also face significant challenges in access to capital and customers To overcome such problems they can form alliances either with each other or with larger companies Hasik traces the trade offs of such alliances and provides crucial insight into their promises and pitfalls This ground breaking study is a significant contribution to understanding both entrepreneurship and alliances two crucial factors in business generally It will be of interest to readers in the defense sector as well as the wider business community
