Arms Control Without Negotiation From The Cold War To The New World Order:

Weapons Proliferation and World Order Brad Roberts, 2023-09-29 With the end of the Cold War the subject of weapons proliferation has acquired new interest and prominence So too have questions about the nature of the world order that will succeed the structure of the last fifty years This study explores the connections among these topics It describes the prevailing conceptual model of nuclear proliferation evaluates proliferation s changing technical features considers economic and political factors bearing on its future rate and character and speculates about proliferation s implications on the post cold war world order It also considers the role of international public policy in meeting proliferation s challenges Arguing that updated approaches are needed the analysis emphasizes cooperative over coercive approaches to order It concludes with an assessment of progress to date in meeting these new challenges arguing that the new agenda is only slowly coming into focus

The Politics of Positive Incentives in Arms Control Thomas Bernauer, Dieter Ruloff, 1999 They define positive incentives as transfers of positively valued resources such as money technology or know how from one actor to another with the aim of driving the behavior of the recipient in a direction that is desirable from the viewpoint of the provider

BOOK JACKET **U.S. Intervention Policy in the Post-cold War World** Frances K. Scott, 1994 **Arms Control Without Negotiation** Bennett Ramberg, 1993-01-01 Beginning with Mikhail Gorbachev s December 1988 announcement that Moscow intended to unilaterally reduce its conventional armed forces the spotlight on arms control has turned away from negotiated treaties toward unilateral reductions and we have witnessed a number of reciprocal reductions not subject to negotiation **Ibss: Political Science: 1994** British Library of Political and Economic Science at the London School of Economics, 1995-12-08 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

The International Law of Conventional Arms Control in Europe Burak Akçapar, 1996 [The National Security of Small States in a Changing World](#) Efraim Inbar, Gabriel Sheffer, 2013-09-13 The first part of this book is primarily devoted to analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world s small states **The Arms Dynamic in World Politics** Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is

the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR *Arms, Transparency, and Security in South-East Asia* Bates Gill, J. N. Mak, 1997 This report jointly sponsored by SIPRI and the Maritime Institute of Malaysia MIMA draws together the work of eight experts on armaments and Asia Pacific security affairs to present analysis and extensive data on arms and defence related transparency mechanisms in South East Asia It also includes a de facto arms trade register for South East Asia covering the period 1975-96 The book will prove useful to security analysts and policy makers seeking analysis of and practical approaches to transparency and confidence building in South East Asia

Peacemaking in International Conflict I. William Zartman, 2007 This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations

Isolationism Reconfigured Eric Nordlinger, 1996-08-05 This iconoclastic and fundamental work Eric Nordlinger's last advocates a new variant of isolationism a national strategy confining U.S. military actions largely to North America and to neighboring sea and air lanes but encouraging international activism and engagement in nonsecurity realms In Nordlinger's view disengaging from security commitments on distant shores would liberate the United States to use its resources and decision making powers to act more effectively abroad in matters of economic policy and human rights A national strategy would then become a powerful new method of encouraging international ideals of democracy and isolationism would be freed of its previous associations with appeasement weakness economic protectionism and self-serving nationalism Nordlinger draws on the recent historical record to show that a national strategy would have lessened the perils of earlier decades including those of the Cold War While real dangers did exist during this period engaged strategies such as containment too often exacerbated them The United States could have effectively and far less expensively helped to deter Communist aggression in Europe and Asia by encouraging other nations to make larger investments in their own protection Marshaling impressive empirical evidence in defense of a controversial position this final work by a leading scholar of international affairs is essential reading for scholars practitioners and lay readers alike

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in

Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it **The**

Reagan Revolution IV: From Victory to the New World Order Richard C. Thornton, 2013-08-06 History of Reagan's victory over the Soviet Union in the Cold War and his defeat at the hands of his domestic political opponents who sought accommodation with Moscow over victory The book traces the climax of a two decade long struggle within the American establishment over strategy known as the Iran Contra scandal As detailed in this volume the scandal masked both the president's political defeat and the fundamental change that occurred in American national security strategy *Special Bibliography Series* United States Air Force Academy. Library, 1994 **Negotiation, Identity and Justice** Daniel

Druckman, 2023-04-25 This volume presents contributions made by Daniel Druckman on the topics of negotiation national identity and justice Containing research conducted and published over a half century the volume is divided into seven thematic parts that cover the multifaceted career flexibility in negotiation values and interests turning points national identity and process and outcome justice It rounds off with a reflective and forward looking conclusion Each part is prefaced with an introduction that highlights the chapters to follow The chapters comprise empirical theoretical and state of the art articles These essays offer an array of research approaches which include experiments simulations and case studies with topics ranging from boundary roles and turning points in negotiation to nationalism and war and the way that research is used in skills training for diplomats and in the development of government policies In addition the book provides rare glimpses of behind the scenes networks sponsors and events with personal stories that also make evident that there is more to a career than what appears in print The articles chosen for inclusion are a small set of the total number of career publications by the author but are the ones that made a substantial impact in their respective fields The concluding section looks back at how the author's career connects to classical ideas and the value of an evidence based approach to scholarship and practice It also looks forward to directions for future research in six areas This book will be of considerable interest to students of international negotiation conflict resolution security studies and international relations Chapter 16 of this book is

The proliferation of all kinds of weapons is a focal point for international security. This work shows how both the language used to talk about weapons proliferation and the practices adopted to respond to it serve to define the problem in ways that promote policy responses doomed to failure.
