Arms Trade World Issues:

The International Arms Trade Rachel Stohl, Suzette Grillot, 2013-04-29 The multi billion dollar business of the international conventional arms trade involves virtually every country in the world Around the globe people's lives are being irrevocably changed by the effects of guns tanks and missiles These weapons have the potential to cause a deadly and current threat one responsible for hundreds of thousands of deaths a year This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade The first book on the subject in nearly a decade The International Arms Trade provides an engaging introduction to the trade the effects and the consequences of these weapons The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War In particular they assess the role of the largest arms exporters and importers the business of selling conventional arms around the world and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities The International Arms Trade will be invaluable for students and scholars of international relations and security studies and for policymakers and anyone interested in understanding more about the conventional arms trade

International Relations and World Politics Kahlil Newton, 2019-09-01 The world in which we are living in is passing through a great period of transition The human history is undergoing new experiences and experiments It is also to be noted in the study of international relations and world politics While one must duly recognise the uniqueness of certain events and developments we are more concerned with the processes and patterns of behaviour found in the world politics The importance of the study of international relations is more significant and urgent because the world is getting increasingly interdependent Relations among states have an ever widening and deepening impact on the economic intellectual and social conditions of our existence The study of international relations as an academic discipline would solve all over internal and international problems You can analyse and explain contemporary international phenomena including identifying and assessing the positions and interests of key international subjects

Chinese Grand Strategy in the 21st Century Thomas M. Kane, Noah Falkovich, 2023-10-20 This book examines the state of China's grand strategy in the 21st century including political military and economic factors Over the past two decades the People's Republic of China PRC has attained the second highest gross domestic product in the world taken a leadership role in East Asian regional organisations and substantially improved its military capabilities Each of these developments and many others like them have attracted attention from scholars journalists and policymakers Less frequently

acknowledged but perhaps of greater significance is the impressive congruence of Beijing's accomplishments. This book highlights how the PRC's successes support one another and pave the way for future accomplishments and how these successes seem to be achieved in an unusually coherent and purposeful way. As Beijing's relations with the rest of the world continue to evolve with events ranging from the ongoing global economic crisis to the turbulence in China's own stock market which may bring the PRC's government under pressure to re-order its priorities, this book assesses China's grand strategy and long-term approach to national policy. It identifies the political, military, and economic instruments it is likely to use, the key challenges which it will face, and explores the implications for the global community. This book will be of great interest to students of Chinese politics, foreign policy, strategic studies, international security, and IR in general. Report of the North Carolina Geological Survey Ebenezer Emmons, North Carolina. State Geologist, 1858 **Report of the North Carolina Geological Survey** North Carolina. State Geologist, 1858 Loving Arms Karen Schneider, 2021-09-15 Loving Arms examines the war-related writings of five British women whose works explore the connections among gender, war, and story-telling. While not the first study to relate the subjects of gender and war, it is the first within a growing body of criticism to focus specifically on British culture during and after World War II. Evoking the famous St. Crispin's Day speech from Henry V and then her own father's account of being moved to tears on V-J Day because he had been too young to fight, Karen Schneider posits that the war story has a far-reaching potency. She admits perhaps for all of us that such stories had powerfully shaped my consciousness in ways I could not completely resist. How a story is narrated and by whom are matters of no small importance. As widely defined and accepted war stories are men's stories. If we are to hear an other story of war, then we must listen to the stories women tell. Many of the war stories written by women insist that war is not the condition of men but rather the condition of humanity beginning with relations between the sexes. For the five women whose work is examined in Loving Arms, Stevie Smith, Katharine Burdekin, Virginia Woolf, Elizabeth Bowen, and Doris Lessing, this latter point was particularly relevant. Their positions as women within a patriarchal, militarist culture that was externally threatened by an overtly fascist one led to an acute ambivalence, says Schneider. Though all five women perceived the war from substantially different perspectives, each in her own way exposed and critiqued the seductive power of war and war stories with their densely interwoven tropes of masculinity and nationalism. Yet these writers' conflicting impulses of loyalty to England and resistance to the war betray their ambivalence. Loving Arms will interest students of twentieth-century British literature and culture, gender studies, and narratology. Even today we maintain an unabated love affair with the war story. But

unless we listen to what the women had to say fifty years ago we are doomed to hear only the same old story
