Koplow, 2021-01-26 This book first published in 1997 examines the forced merger between national security interests and environmental policy makers arising from the Chemical Weapons Convention and its requirement to safely dismantle the world's chemical weapons stockpiles The two groups had to find a way to intersect and work together and this book analyses the problems and politics involved Arms Control in the Post-cold War World Trevor Findlay, 1993 Administrative and Expert Monitoring of International Treaties Paul Szasz, 2023-07-24 This work is an in depth examination of the monitoring controls in some of the world's major international organizations and other treaty regimes The editor one of the foremost and most experienced authorities in this specialized but crucially important field shows how monitoring is used in the common interest to ensure the stability and growth of global standards in such diverse areas as human rights environmental protection and arms control Published under the Transnational Publishers imprint Negotiating START Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to

strategic stability and arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America s own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty s implications

Germ Gambits Amy Smithson, 2011-07-18 This book tells the tale of how international inspectors beat incredible odds to unveil Iraq s covert bioweapons program draws lessons from this experience that should be applied to help arrest future bioweapons programs places the Iraq bioweapons saga in the context of other manmade biological risks and makes recommendations to reduce those perils
