Manual of Romance Languages in Africa Ursula Reutner, 2023-12-18 With more than two thousand languages spread over its territory, multilingualism is a common reality in Africa. The main official languages of most African countries are Indo-European. In many instances, Romance languages were primarily brought to Africa in the era of colonization; the areas discussed in this volume are thirty-five states that were once ruled by Belgium, France, Italy, Portugal, or Spain, and the African regions still belonging to three of them. Twenty-six states are presented in relation to French, four to Italian, six to Portuguese, and two to Spanish. They are considered in separate chapters according to their sociolinguistic situation, linguistic history, external language policy, linguistic characteristics, and internal language policy. The result is a comprehensive overview of the Romance languages in modern-day Africa. It follows a coherent structure, offers linguistic and sociolinguistic information, and illustrates language contact situations, power relations, as well as the cross-fertilization and mutual enrichment emerging from the interplay of languages and cultures in Africa.

Environmental History in the Making Estelita Vaz, Cristina Joanaz de Melo, Lígia M. Costa Pinto, 2016-10-13 This book is the product of the 2nd World Conference on Environmental History held in Guimarães, Portugal, in 2014. It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future. It reveals how our cultural background and examples of past

territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions Considering that political ideologies such as socialism and capitalism as well as religion fail to offer global paradigms for common ground an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors real or invented and avoid repeating ecological loss Therefore agency environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political cultural and economic interests in the public arena This book intertwines reflections on our bonds with landscapes processes of natural and scientific transfer across the globe the changing of ecosystems the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it in today's world can offer alternatives that avoid harming those same vital natural resources water soil and air In addition it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached from technical intervention in the world In short the book firstly studies the past approaching it as a data set of how the environment has shaped culture secondly seeks to understand the present and thirdly assesses future perspectives what to keep what to change and what to dream anew considering that conventional solutions have not sufficed to protect life on our planet Catalogues No. 111-114, 137, 141, 147, 148, 151 Bernard Quaritch (Firm), 1891 Western Europe, North

America and Australasia Rolf Bohme, 2013-10-22 Topographic mapping plays a basic and important role within the extensive field of cartography In recent years this type of mapping has become somewhat neglected and available literature is normally restricted to details concerning the programmes of individual countries often presented in the form of monographs
