Architecture for Spain's Recovered Democracy Manuel López Segura, 2023-03-30 Historical studies on the involvement of architecture in twentieth century politics have overlooked its contribution to building Spain's democracy This pioneering book seeks to fill that void Between the late 1970s and early 1990s Spain founded representative institutions launched its welfare state and devolved autonomy to its regions The study brings forth the architectural incarnation of that threefold program as it deployed in the Valencian Country a Catalan speaking region on Spain's Mediterranean shores There social democratic authorities mobilized architects planners and graphic artists to devise a newly open public sphere and to recover a local identity that Franco's dictatorship had repressed for decades The research follows the impetus of reform and its contradictions through urban projects designs for cultural amenities and the renovation of governmental and professional bodies Architecture for Spain's Recovered Democracy contributes to current debates on nationalism and the arts the environments of democratic socialism and postmodernism and neoliberalism As a result it widens our understanding of how peripheral regions may yield egalitarian architectures of resistance This book is written for students and researchers in architecture and planning art history spatial politics and Hispanic studies as well as for a general readership interested in inclusive politics in the built environment Arquitectura y urbanismo valenciano en el franquismo (1939-1975) Pascual

Patuel Chust, 2021-01-18 Aunque los casi cuarenta años que duró el franquismo constituyen una etapa dominada por el autoritarismo político en el contexto de la arquitectura y el urbanismo desarrollados en el seno del mundo valenciano hay que valorar la labor de muchos arquitectos que supieron entroncar con la modernidad constructiva urbanística y convertirse en excelentes profesionales a pesar de los condicionantes y las directrices impuestos por un gobierno dirigista Guiados por el eje cronológico y la evolución de las tipologías constructivas y los diseños urbanísticos en el horizonte que se abre tras la Guerra Civil española se puede deslindar bien la presencia de dos periodos arquitectónicos que compartieron cronología inquietudes y lenguajes Tras la contienda se registra la misma vuelta al tradicionalismo que observamos en las artes plásticas

con un tipo de arquitectura historicista que retoma planteamientos anteriores a los años veinte La conexión en el ámbito internacional se produce a mediados de la década de los cincuenta y se sustantiva fundamentalmente en el movimiento moderno Atendiendo a esta situación el texto se ha vertebrado en dos bloques cronológicos que intentan ensamblar la relación dialéctica entre urbanismo y arquitectura El historicismo y la postguerra y La renovación racionalista de mediados de los cincuenta Una contribución fundamental al conocimiento de nuestra arquitectura reciente y el ámbito urbano en el que creció insertos en sus contextos correspondientes porque es difícil apreciar algo que no se conoce suficientemente The Urban Scene and the History of the Future, 1995 **Congrès international, conservation, réhabilitation, recyclage** Université Laval. La construcción del sentido urbano desde los colectivos** Humberto Orozco Barba, 2016-10-17 Hay colectivos ciudadanos que sueñan con cambiar la urbe en la que viven pugnan por convertirla en un sitio más justo y equitativo para todos y luchan contra las acciones burocráticas y capitalistas que deterioran la calidad de vida de sus habitantes Estos movimientos ciudadanos constituyen utopías que implican confrontar a fuertes intereses económicos y políticos en aras de posicionar nuevos significados culturales de lo que representa habitar el espacio público y la convivencia social en la ciudad Esta obra trata precisamente sobre las utopías de los colectivos urbanos al participar en la disputa por la construcción social del sentido de la ciudad A través del testimonio de los utopistas se recupera la experiencia de colectivos que se integraron para incidir en la movilidad la ecología la defensa del hábitat y de los derechos humanos el uso del suelo el agua el bosque y la recuperación del espacio público así como en la sustentabilidad y el mejoramiento de la calidad de vida y los reinterpreta desde el pensamiento filosófico ITESO *Apuntes de órdenes clásicos y composición de arquitectura* Jesús Galindo y Villa, 1898 *Derivas* Roberto Fernández, 2001 *Chile Underground* Andra B Chastain, 2024-11-12 A fascinating historical examination of the Santiago Metro system as a microcosm of Chilean national identity during the twentieth century The Santiago Metro the largest urban infrastructure project in Chile's history was designed in the 1960s in response to rapid urban growth Despite the upheavals of Salvador Allende's democratic socialism 1970-1973 and Augusto Pinochet's military dictatorship 1973-1990 the project survived and is now the largest metro system in South America What explains its success How did its meaning shift under democracy and dictatorship What does its history reveal about struggles for a more just city Drawing on Chilean and French archives Andra B Chastain demonstrates that Chilean French relations and French financing were crucial to the project's survival during the Cold War The Metro's history also illuminates the contested process of implementing neoliberalism and the unexpected continuities of state planning and visions for a rational city that persisted despite free market reforms Most important this story shows that the Metro came to symbolize the nation and became a critical site where planners workers and urban residents contested Chile's path to modernity El arquitecto Francisco Gil González (1905-1962) y la arquitectura salmantina del segundo tercio del siglo XX NÚÑEZ IZQUIERDO, Sara, 2014-08-01 ES Esta obra
