Christianity and the Mass Media in America Quentin J. Schultze,2005-11-09 The mass media and religious groups in America regularly argue about news bias sex and violence on television movie censorship advertiser boycotts broadcast and film content rating systems government regulation of the media the role of mass evangelism in a democracy and many other issues In the United States the major disputes between religion and the media usually have involved Christian churches or parachurch ministries on the one hand and the so called secular media on the other Often the Christian Right locks horns with supposedly liberal Eastern media elite and Hollywood entertainment companies When a major Protestant denomination calls for an economic boycott of Disney the resulting news reports suggest business as usual in the tensions between faith groups and media empires Schultze demonstrates how religion and the media in America have borrowed each other s rhetoric In the process they have also helped to keep each other honest pointing out respective foibles and pretensions Christian media have offered the public as well as religious tribes some of the best media criticism better than most of the media criticism produced by mainstream media themselves Meanwhile mainstream media have rightly taken particular churches to task for misdeeds as well as offered some surprisingly good depictions of religious life The tension between Christian groups and the media in America ultimately is a

good thing that can serve the interest of democratic life As Alexis de Tocqueville discovered in the 1830s American Christianity can foster the habits of the heart that ward off the antisocial acids of radical individualism And as John Dewey argued a century later the media offer some of our best hopes for maintaining a public life in the face of the religious tribalism that can erode democracy from within Mainstream media and Christianity will always be at odds in a democracy That is exactly the way it should be for the good of each one Library of Congress Subject Headings Library of Congress. The Play Theory of Mass Communication William Stephenson, The literature on mass communication is now dominated by objective sociological approaches What makes the work of Stephenson so unusual is his starting points his frank willingness to adopt a subjective and psychological approach to the study of mass communication In short this is an internal analysis of how communication processes are absorbed by individuals The theory of play is not a doctrine of frivolity but rather a way in which Stephenson gets at such sensitive areas of communication theory as what is screened out and why Without a notion of the play element in communication one would be led to imagine that every televised docudrama would be immediately lived out by every adolescent Clearly this is not the case People can distinguish quite well between imaginary and real events in mass communication contexts The Play Theory of Mass Communication is a work that studies subjective play how communication serves the cause of self enhancement and personal pleasure and the role of entertainment as an end in itself In short for those who are tired of cliché ridden volumes on the political hidden messages and meanings of communication or the economic management of media decisions this volume will come as a refreshment a piece of entertainment as well as instruction But with all the emphasis on aspects Stephenson's volume is shrewdly political He takes up themes ranging from the reduction of international tensions to the happily alienated worker to such pedestrian events as the reporting of foreign Soviet dignitaries in their visits to democratic cultures This is in short an urbane wise book sophisticated in its methodology and critical in its theorizing

Modern Art and the Life of a Culture Jonathan A. Anderson, William A. Dyrness, 2016-05-23 In 1970 Hans Rookmaaker published *Modern Art and the Death of a Culture* a groundbreaking work that considered the role of the Christian artist in society This volume responds to his work by bringing together a practicing artist and a theologian who argue that modernist art is underwritten by deeply religious concerns Library of Congress Subject Headings: P-Z Library of Congress.
