Art And Representation Contributions To Contemporary Aesthetics:

Art and Representation Ananta C. Sukla, 2000-12-30 Concentrating on scholarship over the past four decades this multidisciplinary approach to representation considers conceptual issues about representation and applies different theories to various arts Following an introduction that traces the historical debates surrounding the concept of representation Part One focuses on representation and language epistemology politics and history sacrificial rites possible world and postmodernism Part Two applies current theories to painting photography literature music dance and film Writings highlight the vital role representation plays in the formation and appreciation of major genres of art This work will appeal to art philosophy and aesthetics scholars and to cultural studies and linguistic scholars Rather than advocate certain theories the essays illustrate the inherent complexities of representation

Mathematics in Twentieth-Century Literature & Art Robert Tubbs, 2021-04-27 The author of What Is a Number examines the relationship between mathematics and art and literature of the 20th century During the twentieth century many artists and writers turned to abstract mathematical ideas to help them realize their aesthetic ambitions Man Ray Marcel Duchamp and perhaps most famously Piet Mondrian used principles of mathematics in their work Was it coincidence or were these artists following their instincts which were ruled by mathematical underpinnings such as optimal solutions for filling a space If math exists within visual art can it be found within literary pursuits In short just what is the relationship between mathematics and the creative arts In this exploration of mathematical ideas in art and literature Robert Tubbs

argues that the links are much stronger than previously imagined and exceed both coincidence and commonality of purpose. Not only does he argue that mathematical ideas guided the aesthetic visions of many twentieth century artists and writers, Tubbs further asserts that artists and writers used math in their creative processes even though they seemed to have no affinity for mathematical thinking. In the end, Tubbs makes the case that art can be better appreciated when the math that inspired it is better understood. An insightful tour of the great masters of the last century and an argument that challenges long held paradigms, this book will appeal to mathematicians, humanists, and artists, as well as instructors teaching the connections among math, literature, and art. Though the content of Tubbs's book is challenging, it is also accessible and should interest many on both sides of the perceived divide between mathematics and the arts.

Choice *Decolonial Aesthetics of Blackness in Contemporary Art* Nkosinkulu, Zingisa, 2024-09-13. Decolonial aesthetics of Blackness in contemporary art challenge and redefine traditional narratives, offering a profound critique of historical and ongoing injustices. This approach emphasizes the reclamation and celebration of Black cultural identities through innovative artistic expressions that resist colonialist frameworks and oppressive stereotypes. By emphasizing the experiences and perspectives of Black artists, decolonial aesthetics challenge the power structures presented in art history and highlight the significance of autonomy, representation, and authenticity. To advance this dialogue, it is crucial to support and engage with Black artists and their work, ensuring that their voices are amplified and their contributions are recognized within art discourse. *Decolonial Aesthetics of Blackness in Contemporary Art* focuses on the generative audio and visual inscription of blackness as an offering of life and beauty in contemporary art. It discusses the concept of blackness related to modernity, decolonial aesthetics, and the ontology of black life and beauty. This book covers topics such as decolonization, visual art, and sociology and is a useful resource for art historians, visual artists, sociologists, academicians, scientists, and researchers.

The Exemplifying Past Chiel Akker, 2025-10-01. This book addresses a wide range of philosophical problems about history and the semantics of time. The point of departure is the distinction between events under the description of past witnesses and their contemporaries and events under the description of historians. Its main claim is that a thesis on the past is exemplified rather than being justified by the available evidence. Such a thesis, the book argues, retroactively becomes concrete in the past under consideration. This book will not only appeal to philosophers and historians but to students and scholars across the humanities.

Communication of Migration in Media and Arts Vildan MAHMUTOĞLU, John Morán GONZÁLEZ, 2020-10-23. The main function of traditional media is to provide timely information to the public, but today traditional media cannot fulfill these expectations with regard to the fluid nature of global migration. New digital media technologies, such as social media, have arisen to fill the void, narrating the lives of migrants in artistic terms that bear the traces of the major social issues of migration. In this critical anthology, contributors examine the intersection of migration, art, and media studies in order to critically analyse the impact of their confluence upon migrant and receiving communities.
